

the.difficult airwaycourse™

CRITICAL CARE

Advanced course focusing exclusively on airway challenges posed by critically ill inpatients.

✓ **Stay Ahead of the Crisis**

Learn to recognize early warning signs of a difficult airway and act before it becomes a failed airway.

✓ **Master Advanced Airway Techniques**

Learn when (and when not) to use medications, perform awake intubation with confidence, and build skills and strategies for the most complex situations.

✓ **Train for the Realities of Critical Care**

Prepare for high stakes scenarios you face every day, including:

- Severe upper airway obstruction
- The massively obese patient
- ARDS with refractory hypoxemia
- Tracheostomy complications, including accidental dislodgement
- The bleeding, traumatized, or vomit-filled airway
- Right ventricular failure impacting airway decisions.

✓ **Experience Hands-on, Dynamic Training**

Our expert faculty guides you through immersive simulations, practical airway techniques, and evidence-based algorithms designed to improve outcomes when seconds matter.
