11TH ICN NP/APN NETWORK CONFERENCE

August 29 - September 1, 2021 - VIRTUAL

The Conference is the largest international meetings on **advanced practice nursing** and brings together **more than 1,000 attendees** from around the world.

In partnership with the **International Council of Nurses** and the **Canadian Nurses Association**, this virtual conference promises to be a unique and exciting event under the theme **Envisioning Advanced Practice Nursing Beyond 2020: Wider Reach, Bigger Impact**.

Delegates can actively participate and network in the virtual conference. This interactive meeting will provide a great variety of content including plenaries, panels, concurrent sessions, clinical workshops, e-poster displays, symposia and discussion round tables.

The designation of 2020 as the **International Year of the Nurse and Midwife** and the arrival of the COVID-19 pandemic have shone a spotlight on the nursing profession. The World Health Organization has now designated 2021 as the **International Year of the Health and Care Worker**, a further opportunity for the nursing profession to be recognized for their invaluable work.

The conference theme was deeply inspired by Florence Nightingale, who by today's standards would have been the world's very first advanced practice nurse. It challenges us to look forward and to **set the foundation for developing and expanding the reach and impact of the next generation** of nurse practitioners and advanced practice nurses around the globe.

Join this **international virtual gathering** for four days of knowledge transfer, lively discussions and networking.

JOINTLY PRESENTED BY

AT A GLANCE
