

THE COLLEGE  
OF DIPLOMATES OF THE  
AMERICAN BOARD OF ORTHODONTICS

# BACK TO THE FUTURE IN ORTHODONTICS

JULY 11-14, 2025  
THE BROADMOOR  
COLORADO SPRINGS, CO

WE LOOK FORWARD TO YOU JOINING  
US AT THE BREATHTAKINGLY  
BEAUTIFUL BROADMOOR

Register at [www.cdabo.org](http://www.cdabo.org) annual meeting page.

# BRINGING BACK THE BUZZ FOR THE BROADMOOR!

My wife, Neleen, and I are extremely honored that you are considering this once-in-a-lifetime meeting to celebrate the 46th reunion of the College of Diplomates of the American Board of Orthodontics at the Broadmoor in Colorado Springs. In 2021 during the original site visit, we went into the Golden Bee Bar on site which is a relocated 20th Century British Pub reassembled. When you walk in, they “flick” a bee sticker on you.

**The Bee has long been the symbol of The College to promote Board Certification. I took it as a sign that this is where our meeting should be. Nearly four years later with constant planning, we are on the verge of making history with the largest meeting ever for the College. Our new logo and seal incorporating the bee is a recognition of our past while we embrace the Future.**

According to Forbes Travel Guide, the Five-Star Broadmoor resort’s main campus is located on 5,000 acres in Colorado Springs. The resort offers many activities for its guests including falconry, pickleball, zip lining, world-class golf, paddle boating, swimming, tennis, fly fishing, even an onsite movie theatre, and so much more. Families will love ‘Play at the Broadmoor,’ which offers six lanes of bowling and a menu that offers choices for everyone.

There is excellent hiking nearby. The Broadmoor Seven Falls is a must-visit, as is the famed Garden of the Gods red rock formations and the luxurious Colorado hotel is all within a few miles of the funky, small art town of Manitou Springs. Located here is The Broadmoor Manitou and Pikes Peak Cog Railway offering an unforgettable way to experience American’s Mountain during every season. There is also the Cheyenne Mountain Zoo, created by Broadmoor’s founder, Spencer Penrose, a few minutes away by complimentary shuttle.

During your stay, you’ll learn little tidbits of the hotel’s early 20th-century history. When you walk into the original Broadmoor Main building, you’ll find an extensive 1,000-bottle collection of Prohibition-era wine and spirits (part of Penrose’s personal collection) encased in glass along the walls; a unique display dubbed “Bottle Alley.”

Dr. Matthew Ng, our Scientific Chair, has put together a breakthrough scientific program which is the hallmark of the College meeting. Lecturers will come from all over the world; South Africa, Portugal, Canada, and the United States will all share their “Back to the Future” approach to contemporary orthodontic treatment. Our amazing 2024-2025 College Councilors have done tremendous work to bring the organization into the 21st century and all of us welcome you to the Broadmoor to continue to create memories that last a lifetime. We wish you safe travels to begin your adventure. Where we are going, we don’t need roads!!

**Sandy and Neleen Bigman and Taz**

*President of The College*

# SCHEDULE

Go to [www.cdabo.org](http://www.cdabo.org) annual meeting page for more information and to complete online registration.

## FRIDAY JULY 11

|                      |                                                        |                           |
|----------------------|--------------------------------------------------------|---------------------------|
| 8:30a.m. – 9:30a.m.  | Joint Council/ABO Meeting                              | Gaylord Boardroom         |
| 9:30a.m. – 11:30a.m. | Council Meeting                                        | Gaylord Boardroom         |
| 11:30a.m. – 6:00p.m. | <b>Registration Desk Open</b>                          | Rocky Mountain Foyer      |
| 12:00p.m. – 1:00p.m. | <b>ReCert Prep Course</b>                              | Rocky Mountain Ballroom   |
| 1:15p.m. – 5:15p.m.  | <b>ABO Scenario-based Clinical Exam Prep Course</b>    | Rocky Mountain Ballroom   |
| 6:00p.m. – 8:00p.m.  | <b>Welcome Reception</b> (Meal included & cash bar)    | West Tower Lawn (outside) |
| 7:45p.m.             | <b>Group Photo</b>                                     | West Tower Lawn (outside) |
| 8:15p.m. – 10:15p.m. | <b>Back to the Future Movie</b> (Concessions included) | Broadmoor Theater         |

## SATURDAY JULY 12

|                       |                                                         |                                 |
|-----------------------|---------------------------------------------------------|---------------------------------|
| 7:00a.m. – 12:00p.m.  | <b>Registration Desk Open</b>                           | Rocky Mountain Foyer            |
| 7:00a.m. – 9:00a.m.   | <b>Family Breakfast</b> (Meal included)                 | Mountain View Terrace (outside) |
| 7:30a.m. – 12:00p.m.  | <b>Exhibitor Showcase Open</b>                          | Rocky Mountain Ballroom         |
| 7:45a.m. – 8:00a.m.   | <b>Scientific Sessions Intro</b>                        | Rocky Mountain Ballroom         |
| 8:00a.m. – 10:00a.m.  | <b>Ray C. Thurow Memorial Lecture: Dr. Tom Pitts</b>    | Rocky Mountain Ballroom         |
| 10:00a.m. – 10:30a.m. | <b>Annual Business Meeting</b> (Coffee/tea break)       | Rocky Mountain Ballroom         |
| 10:30a.m. – 12:00p.m. | <b>Lecture: Dr. Nimet Guiga</b>                         | Rocky Mountain Ballroom         |
| 1:00p.m.              | <i>College Golf Tournament Tee Off</i>                  | East Course                     |
| 5:00p.m. – 8:30p.m.   | <i>Flying W Ranch Dinner &amp; Show</i> (Meal included) | Flying W Ranch                  |

## SUNDAY JULY 13

|                       |                                                                                      |                                 |
|-----------------------|--------------------------------------------------------------------------------------|---------------------------------|
| 6:00a.m. – 7:00a.m.   | <i>Fun Run</i> (Includes t-shirt)                                                    |                                 |
| 7:00a.m. – 12:00p.m.  | <b>Registration Desk Open</b>                                                        | Rocky Mountain Foyer            |
| 7:00a.m. – 9:00a.m.   | <b>Family Breakfast</b> (Meal included)                                              | Mountain View Terrace (outside) |
| 7:30a.m. – 12:00p.m.  | <b>Exhibitor Showcase Open</b>                                                       | Rocky Mountain Ballroom         |
| 7:45a.m. – 8:00a.m.   | <b>Scientific Sessions Intro</b>                                                     | Rocky Mountain Ballroom         |
| 8:00a.m. – 9:45a.m.   | <b>Lecture: Dr. Mark Wertheimer</b>                                                  | Rocky Mountain Ballroom         |
| 9:30a.m. – 11:30p.m.  | <i>Guest Discussion: Book Club</i> (Coffee/tea break)                                | Fish House on the Golf Course   |
| 9:45a.m. – 10:15a.m.  | <b>Coffee Break in Exhibits</b>                                                      | Rocky Mountain Ballroom         |
| 10:15a.m. – 12:00p.m. | <b>Lecture: Dr. Sylvain Chamberland</b>                                              | Rocky Mountain Ballroom         |
| 5:30p.m. – 10:00p.m.  | <b>President's Dinner Enchantment Under the Sea Dance</b> (Meal included & cash bar) | Cheyenne Lodge                  |

## MONDAY JULY 14

|                       |                                         |                                 |
|-----------------------|-----------------------------------------|---------------------------------|
| 7:00a.m. – 12:00p.m.  | <b>Registration Desk Open</b>           | Rocky Mountain Foyer            |
| 7:00a.m. – 9:00a.m.   | <b>Family Breakfast</b> (Meal included) | Mountain View Terrace (outside) |
| 7:30a.m. – 12:00p.m.  | <b>Exhibitor Showcase Open</b>          | Rocky Mountain Ballroom         |
| 7:45a.m. – 8:00a.m.   | <b>Scientific Sessions Intro</b>        | Rocky Mountain Ballroom         |
| 8:00a.m. – 9:45a.m.   | <b>Lecture: Dr. Sercan Akyalcin</b>     | Rocky Mountain Ballroom         |
| 9:45a.m. – 10:15a.m.  | <b>Coffee Break in Exhibits</b>         | Rocky Mountain Ballroom         |
| 10:15a.m. – 12:00p.m. | <b>Lecture: Dr. Brandon Owen</b>        | Rocky Mountain Ballroom         |

Regular = closed session for Council and ABO

**Bold** = included in registration fee

*Italic* = optional, additional charge with Registration

Events and times are subject to change

### Samir Bishara Award of Merit

The 2024-25 Council is pleased to announce Dr. Dan Rejman as the recipient of the 2025 Samir Bishara Award of Merit.

**Dan Rejman** was born and raised in the Finger Lakes region of Upstate New York. He worked on his family's large dairy farm throughout his childhood and early adult years after attending Hobart College for his undergraduate degree. He started dental school at age 29, after realizing that he

wanted to pursue a career in dentistry. He attended the University of Michigan School of Dentistry and worked as a general dentist for several years outside of Rochester, NY. He decided to become an orthodontist and received his Masters in Orthodontics from Marquette University.

Dr. Rejman spent several years practicing in Annapolis, MD before settling in Castle Rock, Colorado, where he opened his practice with his wife, and office manager, Julie. He currently has two offices in the Castle Rock area, where he and Julie raised their four children.

Dan clearly remembers the day he responded to an email from the College looking for candidates to represent RMSO and SWSO. The question he and his wife discussed..."Aren't we too busy to get involved at this point in our lives?" Looking back at this years later, Dan is incredibly thankful that even though the answer was "yes", he made the decision to get involved with the College. He has made hundreds of cherished relationships and feels great satisfaction to have contributed in some small way to our profession.

The College also allowed Dan to develop a relationship with the American Board of Orthodontics during the transition to the scenario-based clinical examination, and was the instructor of the College's preparatory course for many years. In 2022, he was selected as a Director of the ABO, representing the RMSO. Dan continues to enjoy and value every aspect of both organizations. Dan has dedicated his professional life to orthodontics and is a prime example of going "A Step Beyond" for the College.

### Due for ABO recertification?

Join our Recertification Prep Course for the Board Case Exam on Friday, 7/11/25, from 12p.m. to 1p.m.

With 61% of all orthodontists now board-certified, the College, as of 2024, offers a ReCert Prep Course for those interested in taking the Board Case Exam (BCE) as part of their recertification process.

This 60-minute course, offers 1.0 hours of CE credit and provides the following learning objectives:

- Understand when one is eligible for the ABO renewal and pathways to recertify.
- Gain information on the BCE format and steps to complete this recertification pathway.
- Review key information and articles that BCE questions are drawn from.

**Dr. Jane Wright** is a Board-Certified Orthodontist practicing at Crawford and Wright Orthodontics with her father. She has her BS in Nutrition Science from the University of Minnesota, her DDS and MS in Oral Biology and Orthodontic Certificate from Marquette University. See our website [www.cdabo.org](http://www.cdabo.org) for her full bio as well as the course agenda.

### ABO Scenario-Based Clinical Exam Prep Course

Join our ABO Scenario-Based Clinical Exam Prep Course on Friday, 7/11/25, from 1p.m. to 5p.m.

The College of Diplomates Prep Course is designed to assist participants in preparing for the American Board of Orthodontics Scenario-based Clinical Examination to achieve board certification. The course includes tips on how to prepare and maximize your effectiveness during the ABO Virtual Clinical Examination. Attendees will be invited after the course to join the College Prep Course Facebook Study Group for continued dialogue and sample case practice.

This 4 hour course, offers 4.0 hours of CE credit and provides the following learning objectives:

- Learn about the history and evolution of the ABO Clinical Exam
- Become more familiar with the different parts of the ABO Clinical Exam
- Gain helpful tips and strategies for taking the ABO Clinical Exam

See our website [www.cdabo.org](http://www.cdabo.org) for the bios of our 3 different instructors Dr. Paul Sproul, Dr. Matthew Ng and Dr. Nipul Tanna.

# SCIENTIFIC LECTURES

SATURDAY, JULY 12

7:45a.m.–12p.m. Rocky Mountain Ballroom

## Honorary Ray Thurow Speaker Dr. Tom Pitts

Dr. Thomas Pitts is an accomplished orthodontist with over five decades of experience. He currently serves as the Executive Clinical Director of Ortho Classic, a globally recognized supplier of orthodontic products. With a career spanning back to 1970, Dr. Pitts has dedicated himself to the practice of orthodontics, specializing in smile arc and traditional techniques. A respected figure in the orthodontic community, Dr. Pitts holds a Doctor of Dental Surgery Degree from the University of the Pacific Arthur A. Dugoni School of Dentistry and a Master of Science in Orthodontics Degree from the University of Washington. Known for his groundbreaking contributions to the field, Dr. Pitts has invented the Pitts 21 system, bracket slot, and arch forms, revolutionizing orthodontic practices. His commitment to education is evident through his numerous publications and lectures. Beyond his professional accomplishments, Dr. Pitts values family time and enjoys golfing. His dedication to community affairs reflects his commitment to making a positive impact both in and out of the orthodontic realm.

### Remove the Band-Aid

Dr. Pitts will introduce an avatar that he brings to the specialty of orthodontics. This is not a replacement of traditional orthodontic treatment and finishing, but an addition to 'ideal' finishing tooth relationships, that enhances esthetics and efficiency. It's very important to finish cases with a beautiful functioning occlusion, perio and healthy tooth placement. Will review added protocols that he's worked with for many years as well as show many different types of cases to demonstrate these protocols and results. As well as explain his exam process including diagnosis and treatment planning that begins with esthetics and then examines the typical intra oral discrepancies. He will also address how he promotes his practice very simply and with very little expense. He will address scientific testing as evidence for the efficacy of these protocols/biomechanics. Demonstrating the efficiency gained with his square wire system, which is part of his protocols to help orthodontists be more efficient with less force.

### Learning Objectives

- Learn how to improve 'smile esthetics' and achieve a great occlusion and perio.
- How to achieve great efficiency in treatment with best 'facial esthetics'.
- How to get a great result on numerous surgical cases done non-surgically.

## Dr. Nimet Guiga

Dr. Nimet Guiga, obtained her Doctor of Dental Surgery degree in 1992 at the University of Coimbra Medical School in Portugal. In 1998, she took a 2 year program in Implantology and Oral Surgery at the Biotechnology Institute in Spain. In 2006, she started a post-graduate program in Orthodontics. She completed a 3 year Masters Degree in Orthodontics at the University of Toulouse-Paul Sabatier in France. She then went on to take a Specialist Degree in Orthodontics at the University of Andorra. Dr. Guiga also did a 2 year Specialist program in Lingal Orthodontics at the Complutense University in Madrid, Spain. She then started studying Facial Harmonization focusing on enhancing her orthodontic treatment outcomes by treating dysfunctional muscles related to malocclusions as well as changing soft tissue orthodontic cephalometric points. She now dedicates herself to Facial Driven Orthodontics and the Smile Arc Protocol Technique developed by Dr. Thomas Pitts. She is a worldwide lecturer and is especially proud of lecturing with Dr. Pitts and being part of his teaching team at his 2 year Masters Continuum Program in the USA.

### Get Ahead, Stay Ahead! Game Changing Orthodontics! Untimely Results

Diagnosis and treatment planning for Facially Driven Orthodontics and the optimal position of the upper central incisor are crucial for achieving excellent esthetic outcomes. "Begin with the end in mind," as Dr. Thomas Pitts often says, is key to success. Finishing an orthodontic case starts before the appliance is placed, with a solid diagnosis and plan. Good facial harmony can exist within a wide range of cephalometric values, and even well-treated cases that meet ABO criteria may not produce an esthetic smile. Modern orthodontic care must assess both soft and hard tissue, perform a complete smile analysis, and account for the aging effects on facial and peri-oral tissues.

### Learning Objectives

- Include enhancement of facial beauty as one of the primary elective goals of patients seeking orthodontic care.
- Include the aging effects brought upon the face and peri-oral tissues in treatment planning to create lasting results.
- Use facial harmonization techniques to achieve ideal nose, lip, and chin relationships and proper muscle balance.

**Dr. Mark Wertheimer**

Dr. Mark Wertheimer has been in specialist orthodontist practice since 1996. He has been actively involved with various dental boards and societies during his career and is currently a past Director on the Board of the South African Dental Association; and also past President of the South African Society of Orthodontists.

During his career, Dr. Wertheimer has maintained a keen interest in keeping abreast of new trends and technology in orthodontics and has attended many congresses, both locally and internationally. The most recent being an intensive course in San Francisco dealing specifically with Different Types of Malocclusion with or without Dysfunctional Problems as it relates to occlusion. Dr. Wertheimer graduated as a dentist in 1986 at the University of the Witwatersrand. He graduated as an orthodontist in 1995 and went on to be admitted as a Fellow of the College of Dentistry of SA in the branch of Orthodontics in 1996.

He was involved in the teaching of postgraduate orthodontic students in the Orthodontic department at the Wits Dental School over a period of 16 years.

**Are Implants in the Esthetic Zone a Wise Choice – Revisiting the Dilemma of Missing Teeth**

Missing teeth in the esthetic zone are encountered often. This maybe congenital, or in later life due to various factors, for example, trauma. While implants may be an obvious option, evidence has proven that they often present significant challenges in later years. This lecture explores the various options for treating patients with missing teeth in the esthetic zone, and references the various problems that may arise based on contemporary scientific evidence. Patient examples will be used to illustrate these challenges and the options for treatment.

**Learning Objectives**

- Identify the salient questions regarding treatment for missing teeth in the esthetic zone.
- Review the evidence related to implants in the esthetic zone.
- Explore options to mitigate challenges during treatment of missing teeth in the esthetic zone.

**Dr. Sylvain Chamberland**

Dr. Chamberland received his DMD degree from Laval University in 1983, a Certificate in Orthodontics from University of Montreal in 1990 and a Master degree in dental science in 2008 from Laval University where he was part time clinical instructor and teacher at the undergraduate program of the dental faculty from 1991 to 2008. He

lectures in several graduate programs and scientific meetings in the US, Canada and Europe. He is also a published author.

**Old School is Not Bad School**

The aim of this lecture is to review throughout a retrospective look at cases treated early in my career ask if I would treat them nowadays, what would I do differently.

Several new technologies appear in the orthodontic fields, the bone biology and the tooth don't know where the force to move from whether it is a bracket, a wire of plastic. One should keep in mind that bracket, wire or plastic don't move teeth. Force and momentum does. The bone biology did not change, and it tends to be forgotten if one listens to some advertisements from many companies and their KOL. They want us to try this new magic device for this or that and the orthodontist become the beta tester and may get stuck with failure of the new device to obtain the claimed benefit. A good understanding of biomechanics is mandatory to deliver efficient force systems to move the teeth. Tip back mechanism, intrusive arch, T-loop retraction spring, box loop, transpalatal arch and lingual arch are tools that I still use on a routine basis.

Over the years, I have tried several appliances because I tend to be an early adopter, but in retrospect, I learned the hard way that such or such thing may not work, or the learning curve could be steep. The use of TADS to treat open bite and MARPE for transverse deficiency are good example of new technologies that changes the treatment approach of several malocclusions. We will do some time traveling showing cases with transverse deficiency treated with 3-piece Le Fort 1 to SARPE, to MARPE to DOME.

Surgical treatment planning has evolved from models on articulator, free-hand surgery to 3D surgical planning. We will discuss direct bonding versus indirect bonding. What is the advantage or disadvantage. We will review the treatment approach for OSA patient, complex interdisciplinary treatment involving perio, prosthodontics and surgery.

**Learning Objectives**

- Explore the biomechanics and old school techniques to deliver efficient force systems to move the teeth.
- Understand that new systems are not always better than old systems.
- Review treatment approaches complex interdisciplinary treatments involving perio, prosthodontics and surgery.

MONDAY, JULY 14

7:45a.m.–12p.m. Rocky Mountain Ballroom

**Dr. Sercan Akyalcin**

Dr. Sercan Akyalcin is the Head of Orthodontics at Harvard School of Dental Medicine. He has a DDS-PhD degree and is a graduate of the orthodontic program at the University of Texas Health Science Center at Houston. Before joining Harvard University, he was a faculty member at Tufts University School of Dental Medicine in Boston, where he also

served as the chair and graduate program director of Orthodontics.

Dr. Akyalcin is active in many leadership roles, serving on the Northeast Society of Orthodontists (NESO) Board of Directors and representing NESO on the House of Delegates at the AAO. He also advocates for the Northeast region on the AAO Council on Education. As a dental educator and orthodontist, he has published fifty peer-reviewed papers, co-edited a textbook, contributed to twelve other orthodontic books, and served on the editorial boards of orthodontic and dental journals. In addition, he has been recognized with several awards in the field, including the 2019 Edward H. Angle Research Prize. Additionally, he serves as an examiner for the Council on Dental Accreditation and the American Board of Orthodontics.

**Precision Orthodontics: Days of Future Past**

Malocclusions, specifically skeletal Class II, skeletal Class III, severe crowding, and vertical anomalies such as open and deep bites present unique challenges for orthodontists to diagnose and treat efficiently. Many of these challenges relate to the wide diversity of the clinical presentation and complicating factors such as incisor position and torque, the need for transverse expansion, and vertical management of the case. The attendees will be instructed to identify the needs of their patients and customize their treatments utilizing a personalized approach and custom appliances.

**Learning Objectives**

- Have a better understanding of precision orthodontics and personalized treatment.
- Familiarize themselves with customized appliance design and fabrication.
- Plan and execute treatment of complex cases with a personalized approach.

**Dr. Brandon Owen**

Brandon Owen, DDS, MS is the President and Founder of KLOwen Orthodontics, a legacy company named and dedicated for his son, Keller Logan. He is an ortho-inventor with over 15 years of hands-on practice experience. Dr. Owen earned the first-ever AAO Ortho Innovator Award in 2019 for his invention of the KLOwen Custom Digital

System and honorable mention for the 2024 Ortho Innovator Award for custom metal SL, holds numerous orthodontic patents, and has served as a consultant and advisor for various digital orthodontic systems. Dr. Owen received a BS in from Montana State University-Bozeman, DDS, Orthodontic Residency, MS from University of Minnesota School of Dentistry. He is currently resides in Lakeway, Texas with his wife and two children.

**The Benefits of Custom Braces**

Theoretically, custom makes all the sense in the world. Having brackets and wires deliver the teeth to the original position elevates outcomes and maximizes efficiency. However, the challenge with any system is implementation – getting through the change curve to actually achieve the promise of what digital solutions have to offer. The trick is making technology work for you, not vice versa. We need to understand the real difference between conventional, one-size-fits-all solutions versus custom orthodontics from a results perspective and from an efficiency perspective.

In this session, Dr. Brandon Owen, Founder and President of KLOwen Orthodontics looks at how to accelerate integration to achieve workflow efficiency, deliver quality outcomes, and ultimately realize more predictable ROI for the whole practice – doctor, team, and patients.

**Learning Objectives**

- Understand how filling the slot with a custom bracket gives the practitioner more control.
- Understand how more control can reduce the stress of the orthodontic team.
- Understand how to make custom braces actually deliver a positive ROI.

**ADA CERP®** Continuing Education Recognition Program

The College of Diplomates of the American Board of Orthodontics (the College) is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by board of dentistry. The College of Diplomates of the American Board of Orthodontics designates this activity for up to 17.0 hours of continuing education credits.

# EVENTS & ACTIVITIES

Bring your family! Our agenda allows you to not only gain CE during half day lectures but still have ample time to forge lifelong memories with friends and family! Adventure awaits....

## Social Events included in your registration:

### Friday's Welcome Reception

- Outdoors on the West Tower Lawn overlooking the Cheyenne Lake
- Great food including kid friendly food options
- Music
- Kid friendly crafts and games
- Cash Bar (1 drink ticket for all 21 & up guests included)

### Friday's Back to the Future Movie

- Rated PG for everyone
- Concessions included

### Family Breakfast on Saturday, Sunday, & Monday Morning

- Outdoors on the Mountain View Terrace
- Delicious food and hot coffee to start your day

### Sunday's President's Dinner

- Cheyenne Lodge with beautiful views
- Delicious food even kid friendly
- Cash bar (2 drink tickets for all 21 & up guests included)
- Enchantment Under the Sea Themed Dance – Dress as if it's prom in 1955. Be there or be square!

### Golden Bee

- Enjoy great food drinks and sing-a-long songs at an authentic English pub that was brought panel by panel to the Broadmoor in 1961.
- Upon arrival, you will be flicked with a bee sticker to welcome you to the Golden Bee. We plan to close out each evening for fun and camaraderie while wearing our bees with pride.

### Optional Activities for an additional fee:

#### Saturday's College Golf Tournament

- \$235 per person includes tourney fees, box lunch & bottled water.
- Broadmoor's East Golf Course with a 5 Star Rating by Golf Digest
- Top 25 Golf Resort in the World and hosting the 2025 US Senior Open

#### Saturday's Flying W Ranch Dinner & Show

- Kid friendly with petting zoo, hayrides, ponies, train ride, axe throwing & more
- Delicious Chuckwagon food of brisket, chicken, beans, potatoes, applesauce, & bread
- Entertaining Western music by the talented Flying W Wranglers
- Visit their website [www.flyingw.com](http://www.flyingw.com).

#### Sunday's Fun Run

- T-shirt included
- Start your morning off with some competitive but fun cardio!

#### Sunday's Guest Discussion: Book Club

- Enjoy a golf cart ride to the lovely, rustic Fish House.
- Read *A Lady's Life in the Rocky Mountains* by Isabella Bird in advance.
- Guest discussion with refreshments

- U.S. Olympic & Paralympic Museum
- Ice Skating at the Broadmoor World Arena

## Silent Auction See the Registration Desk to Participate

Olympic Champion Peggy Fleming called the Broadmoor home during her training career and has agreed to part with some of her memorabilia for a silent auction to benefit the United States Figure Skating Association Memorial Fund in honor of the

skaters and coaches from the Broadmoor who lost their lives on their way to the World Championships in Prague in 1961. The fund helps today's Olympians. Visit [www.usfigureskating.org/memorial-fund](http://www.usfigureskating.org/memorial-fund) for more details.
