1600 Hours	Tea & Close

Dear Colleagues,

It gives me great pleasure to invite you to our 1st National Seminar on Ultrasound in Obstetric Emergencies. Obstetric emergencies are often unpredictable and if not diagnosed and managed on time, can lead to increased maternal and perinatal morbidity and mortality. With the advancement in the technology of ultrasound scan machines and a better understanding of obstetric emergency pathologies, we can use the ultrasound scan to make earlier and more accurate diagnosis and assessment of obstetric emergencies. This seminar will be a good avenue for doctors and sonographers to learn how to use the ultrasound to diagnose the common and not so common obstetric emergencies that one sees in the clinic and hospital settings.

Hope to see you in Ipoh.
Dr Japaraj Robert Peter
