Rockhampton Nurses' Conference - 2017

2 Day Conference for Nurses - Learn Locally with Ausmed

Need for Program

Healthcare is undergoing major changes which are affecting the way nurses provide care. Regular appraisal of knowledge, skill and practice gaps are vital if nurses are to deliver safe and quality care consistent with their scope of practice. Changes include:

- A shift away from health practitioner locus of control to the patient
- Increasing professional accountability
- Emphasis on measurable, high quality and safe care
- Greater transparency for health care actions
- Personal responsibility for ongoing education to guide practice

Addressing these gaps is crucial. Nurses need to be confident the practice they provide is current and reflects appropriate evidence. Access to up-to-date education is essential.

Purpose of Program

Attending this conference will improve your knowledge, skills and practice relating to a range of current professional and clinical practice issues. In so doing, you will be better positioned to improve patient outcomes and patient satisfaction relating to care.

Learning Outcomes

At the conclusion of this program it is expected that the participants will be able to:

- Recognise people who have health risks and implement preventative action to avoid illness
- Improve knowledge of specific nursing interventions that result in better patient outcomes
- Embrace clinical practices that encompass inter professional knowledge to enhance patient outcomes
- Deliver patient outcomes that are underpinned by evidence and evaluate their effectiveness
