PRIMARY CARE EDUCATION SERIES

UT and Methodist present PRIMARY CARE EDUCATION SERIES 2016

This series was developed to link specialist and primary care physicians together to enhance the continuum of care.

The PCES series will allow us to meet the following objectives:

- Improve the quality of patient care;
- Improve the coordination of patient care;
- Increase primary care physician knowledge of when to treat and when to refer; and
- Improve overall patient health outcomes.

The PCES program has also been designed to assist in meeting maintenance of certification (MOC) requirements and to enable physicians to amass the 40 continuing medical education (CME) credit hours within a calendar year needed for maintenance of licensure.
