WEBINAR

#7342 Changing High and Low Muscle Tone Through Neuroplasticity In Pediatrics

Instructor: Karen Pryor PhD, PT, DPT, ND,
CH, CPRCS

Audience: Physical Therapists, Occupational
Therapists, Speech Therapists, and
Assistants

Delivery Options:
Live Webinar or
Self-Study Options

SUMMARY: High or low tone in the muscles interfere with active movements and milestones in the pediatric population. When tone is treated through the sensory systems, neuroplasticity will take place and new functional neural connections develop. The results can positively affect self-feeding and developmental play. Skills acquired in this presentation introduction to Neuroplasticity techniques for tone can be used the next day in your clinic. Course instruction method includes: Lecture, Demonstration, Videos, Pictures, Case Studies and Question/Answers

PRESENTER: Karen Pryor PhD, PT, DPT, ND, CH, CPRCS specializes in neuroplasticity. With a firm belief, when you change the mind the body follows. She is a physical therapist with over 40 years of experience as well as a Naturopathic Doctor. Integration of multiple educational avenues has helped her design advance- programs for rewiring the brain. She received the “Outstanding Volunteer Service Award” from President Obama in 2010 for her work in advancing treatments in children. She received an appointment from Governor Bill Haslam and Governor Bill Lee to the Leadership Interagency Coordinating Council for birth to three-year old children in Tennessee. She has achieved great success in helping children reach their potential. Treatment includes, neuroplasticity techniques and innovations that change the way the brain functions in children with challenges all over the world. Rewiring or changing the routes of information, from vision going to the occipital lobes to the auditory cortex, so children could see through their ears. Developed techniques to change cerebral palsy tone from spastic to approximate normal, so the children could walk without bracing or walkers. Children with Down syndrome to beat the averages, walk 12 – 14 months rather than 2 – 4 years. Karen collaborated with her daughter, chiropractor and developed a successful dyslexia program to orient letters and numbers for those children struggling with reading. *Financial*— Receives a teaching honorarium from Motivations Inc. *Nonfinancial*— No relevant nonfinancial relationship exists.

OBJECTIVES: Upon completion of this course, the participant will be able to:

1. Apply sensory techniques to increase tone in children that demonstrate low tone.
2. Demonstrate manual skills to decrease tone in children with high tone and spasticity.
3. Describe to family members techniques for home programs to advance function in the pediatric patient.

FORMAT: This is a 3-hour course equivalent to 3 CEU's or 0.3 CEUs offered as a live webinar or self-study.

For Live courses, the content is presented via an internet website displaying real time power points. Learners will receive a course instruction link. Instructors lecture through livestreaming internet on your computer. Questions may be asked during the webinar using the chat feature or the “raise hand” feature for live discussion.

For Recorded courses, learners will not be able to participate in real time with questions.

PT CEU's: Motivations Inc is an approved provider of Physical Therapy continuing education by these professional bodies: Texas Chapter of the American Physical Therapy Association, ILDPR- Illinois Department of Professional Regulation Approved PT CE Sponsor, NY- New York State Education Department, Office of the Professions. Physical Therapy Board of California. Many state boards recognize these for pre-approval purposes. Contact us if you would like verification a state.

SLP CEU's: This course is offered for 0.2 ASHA CEUs (Intermediate level, Professional area).

Motivations Inc. is an AOTA Approved Provider of professional development. Course approval ID# 06575. This Distance Learning-Interactive or Distance Learning-Independent activity is offered at 0.3 CEUs, Intermediate Level, Occupational Therapy Service Delivery/Foundational Knowledge. The assignment of AOTA CEU's does not imply endorsement of specific course content, products, or clinical procedures.

AGENDA:

Pre-Study: 30 Minutes Plan to read the course materials, references and review the post test before the start time.

Please be prepared to share patient case study and related question during the discussion time.

- | | |
|----------|--|
| 10:00 | Where does tone come from and how can it be addressed? |
| 10:30 | The nervous system learns through sensation |
| 10:45 | Sensory and motor pathways |
| 11:00 | Torticollis and alignment |
| 11:15 | Low tone and intervention |
| 11:30 | High tone and treatments |
| 11:45 | Tying it all together and question and answer. |
| 12:00 pm | End |

Post-test: 30 Minutes Research, identify, and submit your post-test question answers on the online form. This is an open book test you can take multiple times if needed to obtain the 70% score. Complete the evaluation feedback survey and needs assessment. Obtain and save your auto-emailed certificate for your files.
