Day One

7:30	8:00	Registration
8:00	8:45	Introduction- Statistics of Vestibular Disorders
8:45	9:00	Break
9:00	10:00	Anatomy and Physiology of the Vestibular System
10:00	11:00	Sensory and Motor Components of Balance
11:00	12:30	Clinical Testing Procedures • Oculomotor/VOR • Somatosensory/VSR
12:30	1:00	Lunch (on your own)
1:00	2:45	Categories of Vestibular Disorders • Spontaneous vs. positionally provoked • Central vs. peripheral
2:45	3:15	Mechanisms of Recovery • Injury, compensation and decompensation • Adaptation and habituation • Role of the therapist
3:15	3:30	Break
3:30	5:30	Benign Paroxysmal Positional Vertigo (BPPV) • Cupulolithiasis vs. canalolithiasis • Differential treatment and treatment options
5:30	6:30	Vestibular Rehab Evaluation • Testing procedures • Treatment plan/goal setting

Day Two

8:00	10:30	Vestibular Rehabilitation Evaluation Laboratory • Oculomotor testing • Balance assessment
10:30	12:30	BPPV Laboratory • Testing • Treatment
12:30	1:00	Lunch (on your own)
1:00	3:00	Rehab Management Considerations • Typical treatment progression (according to diagnosis and symptoms) • Marketing strategies • Reimbursement ideas • Equipment/resource ideas

Certificates for attendance are provided upon course completion.

This course is 16 contact hours/1.6 ceus

This course is 19 contact hours/1.9 ceu's for DC, NY or IL therapists

About the Educator

Georgia Groomer, PT, is a 1991 graduate of the University of Texas Health Science Center at San Antonio. She has specialized in vestibular program development and design since 1997. Georgia earned her certificate of clinical competency in the diagnosis and treatment of vestibular disorders in 1999. She has been an instructor with North American Seminars, Inc., since 2000 and has presented locally and nationally on a variety of topics including dizziness, balance disorders, fall prevention and vestibular rehabilitation. Georgia has had the opportunity to practice her unique vestibular evaluation skills and treatment philosophies in a variety of clinical settings including hospital-based outpatient facilities, multi-disciplinary regional balance centers, consultative/staff training for various medical systems and therapy services provided incident-to Otology/Neuro-Otology medical practices. Georgia has worked extensively to educate the primary sector of medicine regarding the role of rehabilitation therapists in the management of dizziness and balance disorders. She has been involved at the local and national levels in campaigning efforts to improve the recognition and reimbursement of vestibular rehabilitation by third party payors. Georgia has developed strategies designed to aid the frustrated vestibular therapist practicing in our current healthcare environment which does not always allow time for a full comprehensive vestibular assessment. Her wide range of experience in vestibular rehabilitation program development enables her to provide an eclectic and practical approach to teaching as well as to patient care.

★ ★ Vestibular Rehabilitation ★ ★ Examination & Treatment DVD

- An advanced educational program featuring examination and treatment techniques associated with vestibular rehabilitation.
- Step-by-step discussion of twenty-eight vestibular examination techniques.
- Twenty-three treatment techniques, including BPPV and Oculomotor-Central techniques are detailed with expert narration.
- Expert Narration by Barry Morgan, PT.
- High quality, professional video production.
- Educate yourself and share the DVD with other professionals for a group savings on CEU credit hours, see website for details.

A great resource tool. \$79.95 with course registration, reg. \$89.95. Free shipping to course site!

IL Provider # 216000074. This course is 12 hours for therapists licensed in NY, IL, DC - CA PT approval # PTNAS-2018-60. NY PT Board approved for 1.0 units. New York State Education Department, Office of the Professions has approved NAS as a continuing education sponsor for physical therapists and assistants licensed in New York. NJ PT approval # 2016-107. PA approval # PTCE006553 (6 Gen, 4 DA). TPIA approval, # 57013. DC Approval # DC-1642. AOTA provider #4487. TPIA provider # 1907038TX. This course meets the continuing education requirements for physical therapists in the States of Alaska, Colorado, Connecticut, Delaware, Idaho, Indiana, Massachusetts, Missouri, Montana, New Hampshire, New Jersey, North Carolina, Oregon, Pennsylvania, Rhode Island, Utah, Vermont, Virginia, Washington and Wisconsin. AOTA provider #4487. Meets requirements for NBCOT. Approved for OT, OTA : AK, AL, CA, CO, FL, GA, HI, ID, KS, ME, MA, MI, NE, NU, NY, ND, UT, VA, WA, WV, WI and WY.

Why You Should Attend This Course

This two-day intermediate level course provides the fundamentals for evaluating and treating vestibular dysfunction. A basic overview of vestibular function and anatomy as well as central nervous system interaction is provided. Hands-on laboratory sessions enhance the clinician's ability to properly perform testing techniques for vestibular disorders. Quite often the "missing link" in the management of a client's complaints lies within the weakness of the vestibular system. A thorough understanding of underlying disorders assist the clinician in developing effective treatment and exercise programs to decrease symptoms and enhance balance and functional ability. Options and considerations for creating treatment plans and long-term care management strategies are thoroughly discussed.

The treatment ideas presented in this course can be applied to patients with vestibular disorders as well as to patients with limitations in balance or sensory integration. Clinicians will be able to immediately apply this information in the clinical setting.

This course is offered to physical therapists, physical therapy assistants, occupational therapists and occupational therapy assistants. An extensive laboratory component is designed to provide clinicians with skills required for the treatment of their balance and vestibular patients.

Course Objectives

Upon completion of this course participants will be able to:

- Identify the anatomical structures responsible for perception of movement and understand their physiological functions.
- Recognize the intricate connections between the vestibular, oculomotor and somatosensory systems and how they combine to maintain stability of posture and vision.
- Recognize and understand the different mechanisms of recovery of the vestibular system and how they impact the course and content of rehabilitation.
- Recognize typical vestibular disorders by symptom and category and identify critical areas for therapeutic intervention.
- Perform evaluative procedures and assess findings (interview/history, Dizziness Handicap Inventory, oculomotor exam, visual-vestibular exam, positional testing, Motion Sensitivity Quotient, Dynamic Gait Index, static balance assessments, systems screening).
- Recognize typical presentations of nystagmus and their relevance to treatment.
- Design an appropriate treatment plan including; appropriate tasks, therapeutic exercises and measurable goals.
- Perform appropriate therapeutic exercises and procedures to patients with vestibular disorders.
