7.0 hours of CME/8.4 CE credits

Don't miss this exciting and unique opportunity to improve your skills in diagnosing and treating common skin diseases. This course consists of interactive lectures covering high yield, bread and butter dermatology topics including acne, psoriasis, dermatitis, moles, skin infections, and more. Attendees will learn how to diagnosis and manage common skin conditions from experienced dermatologists and dynamic lecturers. Attendees can earn up to **7.0 hours of CME/8.4 CE credits**. We look forward to seeing you on **Friday April 13, 2018!** Don't miss out – register early and save on registration. This conference is for you: All medical care providers, including: Family Physicians, Internists, Pediatricians, Dermatology Nurse Practitioners and Physician Assistants, Primary Care Nurse Practitioners and Physician Assistants, all physicians, residents, fellows, pharmacists, nurses and medical assistants will all gain important insights into the diagnosis and management of patients with skin diseases.

Learning Objectives: At the conclusion of this live conference, participants should be better able to:

1. Incorporate into daily practice evidenced-based recommendations on new therapies for common dermatologic diseases.
2. Discern early signs and symptoms of psoriatic arthritis.
3. Explain the roles of current therapeutic agents in the treatment of psoriasis and psoriatic arthritis.
4. Integrate treatment approaches for the pediatric patient with common as well as severe skin diseases.
5. Implement updated strategies for the diagnosis and management of psoriasis, psoriatic arthritis, acne, rosacea, atopic dermatitis, contact dermatitis, actinic keratosis, melanoma, and non-melanoma skin cancers.
6. Discuss common therapeutic regimens for the treatment of acne and rosacea.
7. Analyze different types of drug-induced cutaneous reactions and their common culprits.
8. Discuss the clinical findings and treatment options of actinic keratoses and skin cancers.
9. Explain the different classes of topical corticosteroids and their appropriate uses.
10. Determine which topical steroid, which base, and the quantity to prescribe in various clinical scenarios.
11. Identify when combination topical steroid products are indicated and when they are contraindicated.
12. Discuss currently and newly available non-steroidal topical alternatives and their mechanisms of action.
13. Demonstrate enhanced skill in identifying atypical moles and melanoma.
14. Differentiate between HSV and VZV and describe measures to prevent transmission.
15. Contrast the differences between cellulitis and stasis dermatitis based on recent literature reports.
