Speaker

Jeremy M. Johnson, DO, PhD(c), MS, MSc, BSN, RN, CEN, CCRN-CMC, CFRN, TCRN

Jeremy has spent the last 15 years teaching test prep courses as well as a variety of lectures in critical care and emergency nursing in hospitals and nursing schools. He has spent the majority of his career working at the bedside in various emergency and critical care settings, as well as obtaining several postgraduate degrees in various fields of biology. Jeremy has reviewed several critical care textbooks and contributed to numerous medical and nursing publications in the area of Critical Care and Emergency Medicine. To date, while keeping an active nursing license, Dr. Johnson also works as a practicing Internal Medicine physician and Chief of Aerospace Medicine in the USAF. Jeremy brings clinical and academic experience and knowledge to his lectures. He is also known for his ability to communicate complex physiology and anatomy in a humorous and easy to learn manner.

MED-ED reserves the right to substitute an equally qualified speaker if necessary.

Course Overview

This two-day course provides the critical care nurse with a review of AACN's 2020 core curriculum. The agenda combines central knowledge-based lectures for nurses working in the ICU with an essential review of nursing care and interventions according to the AACN exam blueprint for the critical care provider. This review is not an introduction to the environment of the ICU, but a comprehensive update for the professional already in practice at the bedside and preparing for the certification examination.

For attendees preparing to take the CCRN Exam:

This review course content follows AACN's updated 2020 CCRN Exam blueprint. Professional Caring and Ethical Practice (20% of exam) issues are addressed when appropriate throughout.

Program Learning Outcomes

This program prepares the learner to:

- Discuss and practice test-taking skills.
- Review critical anatomy, physiology and pathophysiology of each system.
- Discuss significant assessment and diagnostic findings relevant to the critical care environment.
- Discuss clinical presentation as well as specific patient management of commonly seen critical care conditions.
