Neuroanatomy Part 1: The Brain

Paddy Garvin-Higgins, MN, RN, CRRN, CNS, PHN

Course Objectives:

Upon completion of this course, learners will be able to:

- State the basic composition of the nervous system as it develops and innervates the brain and connects to the spinal cord
- Illustrate how the ventricular system in the brain is organized to provide protection as it bathes the central nervous system
- Describe the main components of the vascular system that supply the brain
- Identify the main parts of the brain (cerebral cortex, cerebral lobes, brain stem)
- Describe major functions of various parts of the brain
- Discuss the major function of each of the twelve cranial nerves
