

2019 MCW SPINE DAY

AUGUST 9, 2019

The Medical College of Wisconsin's Department of Neurosurgery invites you to our 2019 Spine Day on Friday, August 9th, 2019 at the MCW/Froedtert Campus.

The objectives of this event are to:

- Highlight the evidence surrounding opioid use in spine pain including how to discuss this with your patient, understanding alternative treatments to opioids and the effect these options have on opioid use.*
- Provide an understanding of special considerations for spine pain in athletic populations including the aging athlete and pediatric populations.*
- The athletic panel will also discuss back pain in the golf athlete.*
- Discuss special considerations regarding spine pain in worker's compensation claims to include biopsychosocial considerations and considerations for rehabilitation in this population.*

This symposium is designed for providers who treat patients with spine related disorders and are interested in understanding special populations and helping manage patient expectations and understanding regarding opioids in spine pain.

Jeffrey King, DC, MS
Assistant Professor, Neurosurgery

2019 MCW Spine Day Schedule (04/09/2019)

8:30 – 9:00 AM	Registration and Breakfast	
9:00 – 9:05 AM	Opening Remarks	Shekar N. Kurpad, MD, PhD Jeffrey King, DC, MS
