

MEDICAL CANNABIS FOR HEALTH PROFESSIONALS 3.0 SEMINAR

Medicinal Cannabis was legalised in Australia in November 2016. The global legal cannabis market is expected to grow to over US\$20 billion by 2020.

There is good clinical evidence that it may be of benefit in Chronic Pain, MS, Nausea in Cancer Related Chemotherapy and Drug Resistant Epilepsy. New conditions where the TGA have approved prescriptions include PTSD and Autism.

Come and learn about the latest trends and scientific research in this exciting new field from a range of experts.

SPEAKERS INCLUDE:

- Pharmacists
- Prescribers
- Researchers/Scientists
- Analytical Chemists
- Health Professionals
- Prescribed Patients

Attendance may qualify for Continuing Education (CE/CPD) points.

Tues 12 March 6:30pm - Melbourne, VIC
