Prof Paul A. Tipton, UK

B.D.S., M.Sc., D.G.D.P., Specialist in Prosthodontics
President of the British Academy of Restorative Dentistry (BARD)

Dr Adam Toft, UK

BSc (Hons), BDS (Hons), MFGDP (UK), MMedSci (Rest Dent), Dip Aesth (BARD) FBARD PGCertEd (Sheffield)

Programme (112 CME)

Group 7 started on 23 May 2025. A participant could start the programme from Module 2 (16-19 Oct 2025) and compensate Module 1 with Group 8. As the modules are not required to be completed in a consecutive way, this will not impact the learning experience of the participant in anyway.

Level 1 | 2 Modules | 8 Days | 56 CME

Module 1 | 23-26 May 2025 (4 days) | Fundamentals of Endodontics

Programme outline: Introduction to contemporary endodontics. Understanding of instrument design and its effect on the prevention of iatrogenic errors. Maximising endodontic success and understand factors that influence it. Classification and diagnosis of endodontically diseased teeth. Contemporary endodontics, Radiographic assessment of cases both conventional, CBCT & others. Risk factors in endodontics. Principles of access cavity design and locating straight, accessory and curved canals. Length determination with Standard / crown down / balance forces / modified double flare techniques.

Hands-on training: Rubber Dam application, access cavity preparation and Canal location. Introduction to rotary nickel-titanium shaping with Protaper Gold and Wave One Gold. Obturation Practical- Cold Lateral, single cone, carrier-based Compaction, thermoplastic obturation techniques. Protaper Gold- Gutta Core Obturation and Wave One Gold - Warm Vertical and Continuous Wave Compaction.

Module 2 | 16-19 Oct 2025 (4 days) | Aetiology and Diagnosis of Endodontic Disease

Programme outline: Microbiology of endodontic disease and its relationship with the host immune response. Endodontic Microbiology and biofilm development; Periapical pathology. Pulp reaction to caries. Apex location and length determination. Dental emergencies. Examination, diagnosis and consent.

Hands-on training: Race Evo/ Race R- Motion, XP technologies with XP shaper, finisher and Rotary Glide Path Management. Single cone obturation with calcium silicate-based sealers. XP Expandible NiTi Technologies.

Level 2 | 2 Modules | 8 Days | 56 CME

Module 3 | 05-08 Dec 2025 (4 days) | Restoration of Endodontically Treated Teeth

Programme outline: The Principles of Occlusion in Advanced Restorative Dentistry. Occlusion Examination. Post and Core Techniques. The restorative endodontic Interface. Plastic restoration, posts, intra and extra-coronal restorations, cuspal coverage amal- gam vs composite. Adhesive Techniques for Restoration of the Root Filled Tooth.

Hands-on training: Occlusal examination. Facebows and jaw registration. Shenker, Duralay & Fibre post preps. Posterior Class 1 and Class 2 composites for posterior root filled teeth. Posterior porcelain onlays for posterior root-filled teeth. Placement of core restorations and post-retained restorations.

Module 4 | 12-15 Feb 2026 (4 days) | Management of Endodontic Failure

Programme outline: Rational behind non-surgical endodontic retreatment. Disassembly of commonly used obturation materials. Removal of obturation materials. Disinfection during retreatment. The 3-dimensional anatomy of root canal systems and its relation to root canal treatment failure. Outcome studies on non-surgical root canal treatment. Management of broken endodontic instruments. Calcium silicate cements and their application during non-surgical retreatment. Microsurgical Endodontics. Local anesthesia for surgery, flap design, osteotomy preparation, root end resection and retrograde preparation with microsurgical instruments, precision root end filling with calcium silicate cements and putty, suturing techniques.

Hands-on training: Re-treatment of common endodontic obturation materials. Removal of gutta-percha fillings. Removal of carrier-based materials. Removal of fiber posts. Broken instrument removal and bypassing. Pulp floor perforation repair. Internal resorption defect management. Apical plug placement. Hands-on training using 3D printed special tooth models, sheep cadaveric specimens and microscopes.

Key Facts & Benefits

Group 7 started on 23 May 2025. A participant could start the programme from Module 2 (16-19 Oct 2025) and compensate Module 1 with Group 8.

Level 1 consists of 2 Modules of 4 days each in a total of 8 days. Level 2 consists of 2 Modules of 4 days each in a total of 8 days

Location: CAPP Training Institute located in Dubai, The Greens equipped with microscopes, phantom heads, clinical units with high, low and speed-increasing handpieces

Target audience: GP Dentists, Dental Students, Dental Interns and other Specialist Dentists

Hands-on training (50%) in every module with microscopes

Four different Endodontic systems are used on the course giving the participants the opportunity to understand and train on different systems

Participants will be exposed to dozens of different products and equipment from various dental companies throughout the course

This is a non-commercial and non-sponsored educational course. The speakers are not sponsored or have any commercial interests with any company. The course delivers only high quality and evidence-based education

Accredited by the American Dental Association (ADA C.E.R.P.) with regards to CME points. Recognised by EHS, DoH-Abu Dhabi, DHA & GCC Authorities

Training delivered by UK experts

Provides access to the Online Library of BARD and Tipton Training, where 30 days prior to every module, participant gain access to demo videos, webinars and reading materials

Special attention to each single participant

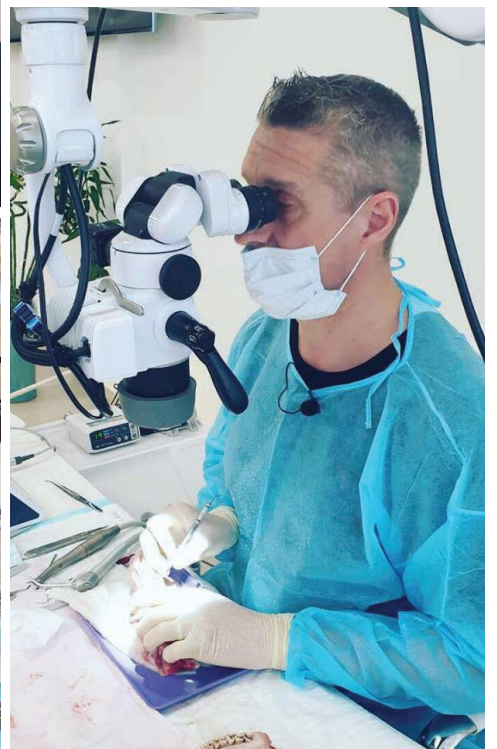

Awarded by the British Academy of Restorative Dentistry (BARD) & CAPP-Tipton Dental Academy

Modules are always on weekends

Payment in instalments possible

What Did They Say

“ It was an amazing course. What to say! For the first time in my life I have such a well-explained and delivered course, believe me I can say it loudly. So many difficult things explained in such an easy way.

Dr. Vartkes Rocco Arzoumanian, UAE

“ I like the lecture material because it is exactly what we need in our practical life.

Dr. Eman Jawad Bo Ali Riyadh, Saudi Arabia

“ The academic and practical approach makes the days fly by. Extremely informative, full of new tips and the doctors are very helpful and simply here to pass on all the needed information.

Dr. Rayan Jamaledine, Kuwait

“ Lectures are very well tied into hands-on segments which further cement concepts taught during the module. Prof. James Prichard is an excellent lecturer, very knowledgeable in his field. I like the limited number of participants allows more in-depth interaction with the professor. Concepts are immediately applicable in the clinical setting.

Dr. Dina Macki, Oman

“ All the hands-on was excellent in terms of topics and scope. Everyone is very approachable learning subjects flow easier.

Dr. Antonio Torres, UAE

“ I liked how Prof. James was open to discussion and how he was engaging with the audience.

Dr. Stephen Denny, UK

“ Totally loved the way Prof. James taught everything step by step, explaining every bit!

Dr. Harshida Dineshchandra Dhanak, UAE

“ Really enjoyed the hands-on, especially using the electronic apex locator. Amazing hands-on session. Informative, and enjoyable; came away knowing more and confident on the application of new techniques.

Dr. Shaista Siddiqui, UAE

“ Just wanted to also say I have thoroughly enjoyed this course and I am so glad I signed up for it. It's very well organised and the professors and amazing. It has definitely done a lot to improve my practice.

Dr. Samra Khalid, Kenya
