

ANTIMICROBIAL RESISTANCE TRAINING

PURPOSE:

Antibiotic resistance poses a serious threat to human health. Infections with antibiotic resistant bacteria can lead to longer hospital stays, higher healthcare costs and an increased risk of death. In the healthcare setting, antibiotic resistant bacteria can spread between patients, increasing health risks further. We will discuss tools to promote optimal antibiotic use for the purpose of preventing the development and spread of antibiotic resistance and other antibiotic associated adverse events.

AGENDA:

- Introduction to Antibiotic Resistance and Other Clinical Consequences of Antibiotic Use
- Microbiology: Susceptibility Testing, Antimicrobial Resistance, and Stewardship
- Antibiotic Stewardship: Core Elements
- Antibiotic Stewardship: Common Interventions
- Antimicrobial Stewardship- Surveillance and Reporting
- Antibiotic Stewardship in Long Term Care and Critical Access Facilities
- How to Use Antibiotics

REGISTRATION:

- Email the attached registration form to:
jill-coleman@ouhsc.edu
- Registration closes 1 week prior to each event.
- 3 participants per facility (others will be waitlisted)

FOR OKLAHOMA MEDICAL PERSONNEL
