FULL LIST OF PRESENTERS AVAILABLE AT HUMANPARA.ORG

MYCOBACTERIAL IMPLICATIONS IN CROHN'S AND CHRONIC INFLAMMATORY DISEASES

For thousands of years, mycobacterial species have caused some of the most insidious diseases in history, such as tuberculosis and leprosy. Featuring experts from across the globe, this conference will present evidence-based research on the role of mycobacteria in Crohn's disease, Type 1 diabetes, multiple sclerosis and other immune conditions.

SEPTEMBER 21 & 22, 2018

LAWRENCE HALL OF SCIENCE
BERKELEY, CA

Interactive Presentations, Panel Discussions, Q&A Sessions
and a Working Group planned. Lunch Provided.
