JOIN YOUR COLLEAGUES IN **PHOENIX** FOR ACG 2025

The Premier GI Clinical Event of the Year!

Dear Colleagues:

I am thrilled to invite you to the American College of Gastroenterology's Annual Scientific Meeting and Postgraduate Course, which the College will host in Phoenix, Arizona for the first time this century! The last time ACG was held in Phoenix was in 1999, the year that Dr. Christina Surawicz served as ACG's first woman president — making this venue even more meaningful.

ACG 2025 will shine a light on the hottest topics in clinical GI, hepatology, and endoscopy, providing an accessible schedule of didactic sessions, clinical symposia, and featured lectures. Through hands-on endoscopy sessions, you'll have the chance to learn practical updates that you can immediately implement when you return to your practice.

Don't miss the chance to join me — in the city that welcomed me and I was fortunate to call home for a brief time — and thousands of your GI friends and colleagues at the Phoenix Convention Center for postgraduate courses and scientific plenary sessions that address the educational needs and priorities of clinical GI practitioners. Reconnect with colleagues, form new connections, interact with faculty, and feel the energy and enthusiasm that only live meetings can offer.

Internationally known faculty and rising stars in the fields of gastroenterology, hepatology, and endoscopy will deliver the latest clinical updates on common and not-so-common GI disorders, engage with attendees, answer questions, and participate in lively debates.

Can't make it to Phoenix for all or part of the meeting? ACG has you covered with convenient virtual or on-demand options for all courses. Access to recorded sessions and on-demand lectures will be available in the ACG Conference Platform until March 31, 2026.

ACG 2025 delivers many benefits to attendees:

- Networking events where you can catch up with colleagues and make new connections
- Accessible scheduling of educational sessions that provide ways to enhance patient care and improve practice efficiency
- CME credits for all courses and MOC points for nearly all courses
- Access to all sessions on-demand so both in-person and virtual attendees will not miss a minute of programming
- Plenary presentations and thousands of posters showcasing high impact clinical research
- An exhibit hall displaying the latest advances in technology and therapeutics
- FREE Endoscopy School Hands-On Workshop Center to learn about new tools and techniques

The ACG Annual Scientific Meeting is the ONLY major GI meeting that is still offered as a member benefit at NO EXTRA CHARGE, thanks to the support of our exhibitors and sponsors. ACG members also receive discounted registration rates for the Postgraduate Course and Friday courses. Without the support of our sponsors and exhibitors, the meeting in its current form would not be possible. Exhibitor participation also gives you the opportunity to learn the latest information about their products without disrupting your busy work schedule. I encourage every attendee to visit the Exhibit Hall while at ACG 2025, take advantage of all that you can see and learn, and express your appreciation to exhibitors for their participation at the meeting.

Join me in Phoenix — from October 24th through 29th, to connect with colleagues and friends while enjoying unmatched clinical education. Take a moment to register today. I can't wait to see you there!

Amy S. Oxenko, MD, FACG, ACG President

ACG TRAILBLAZER LECTURE

The Workforce of the Past and Present — Building Bridges Over Ever-Changing Waters for the Workforce of the Future

Rosemarie L. Fisher, MD, FACP

📅 SATURDAY, OCTOBER 25 | ⌚ 10:00 AM – 10:30 AM | 📍 NORTH BALLROOM

Join colleagues as Dr. Rosemarie Fisher presents the Inaugural ACG Trailblazer Lecture on “The Workforce of the Past and Present — Building Bridges Over Ever-Changing Waters for the Workforce of the Future.” For the future of GI, it is critically important that we all understand the generational and training differences in the GI and hepatology workforce of past and present in order to build a cohesive and harmonious workforce of the future.

Rosemarie Fisher, MD, FACP, is a gastroenterologist who treats patients for a variety of conditions, including malnutrition and short bowel syndrome, and cares for patients who need nutritional support. She also treats patients with irritable bowel syndrome.

“I truly enjoy talking to patients and helping them deal with their illnesses,” says Dr. Fisher. “The role of nutrition support in maintaining a patient’s health is part of this.” She says the best part of her work is being able to help people through difficult times and then continue to follow them for years.

Dr. Fisher is Professor Emeritus of Medicine (Digestive Diseases) at Yale University. She has focused her research on various clinical projects related to both gastrointestinal diseases and nutritional support. She is director of the Yale New Haven Hospital Nutritional Support Team, which has provided her with a multitude of opportunities for the clinical investigation of patients undergoing nutritional support, she says.

In addition to her general GI practice, Dr. Fisher continues to supervise GI Fellows as their continuity clinic. She credits her patients with her continued love of patient care, nutrition and clinical GI and her fellows and residents who keep her young and involved in their education and lives.

📌 Established in 2025, the Trailblazers lecturer is a distinguished individual in the field of medicine, gastroenterology, or hepatology who has done groundbreaking work who is recognized as a pioneer in the field or in the life of the College. The presenter is chosen by the President and Course Directors of the Postgraduate Program and is subject to approval by the Board of Trustees. This newly established lectureship replaces The David Sun Lectureship in Postgraduate Education (1977-2024).

Back by POPULAR DEMAND! OUTSTANDING POSTER PRESENTER RECOGNITION

The College is pleased to continue the tradition of presenting awards for “Outstanding Poster Presenter” at this year’s ACG Meeting in Phoenix. ACG hopes to cultivate the ability of clinical GI researchers to use critical storytelling and presentation skills essential for a career as a clinical investigator and scientific communicator. During the daily Poster Rounds with the Experts, poster presenters may be invited to give a succinct and informative two-minute briefing on their research, followed by one minute of Q&A with a faculty judge. Each judge will select one or more presenters who are best able to communicate their key findings, the significance of their data, and articulate the potential impact of their work for clinicians and patients. Recipients of this award will be recognized with a red ribbon, and will later receive a certificate of recognition. Please note that only those poster presenters who display posters in-person in Phoenix will be eligible for this special designation.
