CANP 42ND ANNUAL EDUCATIONAL CONFERENCE

SUPPORTED BY

March 14-17, 2019

One passion. One purpose. One place.

There's a place where nurse practitioners gather each year to access the latest information on issues affecting the health care industry. A place where ideas are shared and solutions are born. A place where thought-provoking educational sessions and spirit-firing social events are the order of the day. Every day.

That place is the California Association for Nurse Practitioners (CANP) Annual Educational Conference, and it's where you'll want to be.

The CANP Conference is the largest gathering of nurse practitioners on the West Coast, and it's the source for news and updates on topics that include:

- Current health care issues
- Pending legislation
- Practice-enhancing strategies
- The future of the industry

Each year, this event draws more than 600 health care professionals who come together to glean information and exchange ideas. A comprehensive expo invites exploration of the latest products and services, offering exhibits that feature pharmaceutical companies, employers and schools. Whatever your role in the health care arena — nurse practitioner, physician's assistant, nurse midwife, nurse anesthetist, or student — you can find everything you need to educate and enlighten you at this single location.

What CANP is all about

CANP's mission is to advocate on behalf of the more than 21,000 nurse practitioners throughout California. We have been a constant presence at the State Capitol, leading the charge to pass bills that enhance your authority and highlight the critical role you play in the health care arena. We are your staunchest supporters ... your greatest allies ... your partner in the future of the state's health care delivery system.

Our objectives for the CANP Conference are to:

- Provide current clinical, pharmacologic, diagnostic, and management knowledge and skills in patient care across the lifespan
- Present a forum for the exchange of ideas and clinical experiences with colleagues involved in the delivery of patient care
- Discuss professional, educational, and financial issues affecting the role of the advanced practice nurse as they relate to primary and acute care practice specialists
- Offer information on emerging trends in health care, practice management, and political issues to assist advanced practice nurses in positioning their practices for the future of health care
- Challenge participants to consider the intricacies of an interdisciplinary, highly complex health care system as it affects future roles and practice opportunities
