Course Objectives:

This two day course of clinically based lectures and interactive case based discussion addressing all areas of Spinal Imaging (including Trauma) serves as a focus to facilitate problem solving in the spine, utilising the various imaging modalities and their application in a number of pathological scenarios.

A series of lectures delivered by a Faculty including Musculoskeletal Radiologists, Spinal Surgeons and Specialists in Spinal Injury, followed by interactive case based sessions with dedicated film reading and discussion.

Target Audience:

Specialist Registrars and Consultants in Radiology.

Topics Covered include:

- Normal variants in spinal imaging
- Spinal trauma
- Degenerative disc disease
- Marrow disease
- Spinal infection
- Scoliosis
- Non-infective inflammatory disease
- Vertebral collapse
- Sports and overuse injuries in the young
- Spinal stenosis
- Spinal cord and meninges
- Spinal intervention
- The brachial plexus

Registration fee:

£295.00 - to include lunch, refreshments and course dinner
