COURSE
FORMAT

Management of Facial Trauma—Improve Your Skills in the Treatment of Acute Facial Trauma

AOCMF is introducing a new, engaging, and more effective learning approach that is designed for your success.

Excellence in facial surgery across the specialties
www.aocmf.org

Same essentials. Improved delivery.

Our new learning framework teaches the essential AOCMF principles of fracture management. It replaces the AOCMF Principles Course, and features more interaction between course participants and our expert surgeons. Each course includes short standardized lectures and carefully selected cases for small group discussions. This ensures that AOCMF quality standards are met for each participant, no matter where they take place.

Designed for your success

This comprehensive course covers:

- Mandibular fracture treatment, including diagnostic and treatment principles
- Midface fractures, as well as the prevention and treatment of complications and defects

Each course is designed to address patient problems, build on learning outcomes and help you meet the highest quality standards in your practice.

You will gain critical skills and abilities from this course

- Diagnose facial injury through history, physical examination, and diagnostic investigations
- Formulate a treatment plan (operative and non-operative)
- Perform the specific treatment for facial trauma
- Modify the treatment plan when necessary
- Manage patient follow-up and rehabilitation
- Identify and manage complications

Outline of the topics we'll cover

Mid and upper facial trauma

- Surgical approaches to the midface
- Re-establish pre-traumatic occlusion
- Maxillary fractures
- Zygomatic fractures
- Orbital wall fractures
- Naso-orbito-ethmoidal fractures
- Frontal sinus fractures

Mandibular trauma

- Surgical approaches to the mandible
- Mandibular fractures: load-sharing and load-bearing
- Condylar fractures

Other topics (varies on region)

- Pediatric fractures
- Sequencing panfacial fractures
- Other special topics

This course is specifically designed for YOU!

- Surgeons, practitioners, fellows, and researchers involved in the treatment of facial trauma
- Fully-qualified medical specialists in maxillofacial and orthognathic surgery and related disciplines, including those who deal with musculoskeletal head and neck disorders concerning trauma, oncology, reconstruction, and congenital or acquired deformities of the craniofacial skeleton
- Specialists in all stages of their careers

Other benefits

Offered globally in multiple languages

Locally or nationally accredited

Course graduation certificate is provided

Upon completion you can apply for an AOCMF Fellowship, or apply to become an AOCMF faculty member

AOCMF Fellowship: fellowship@aocmf.org

AOCMF Membership: membership@aocmf.org

A new and improved way to learn

You'll notice the difference!

- More time for small group discussions and practicals
- More interaction between participants and expert faculty
- More hands-on activities
- More effective and long term learning
- More dynamic lectures and case studies
- Improved pre-course preparation with 24/7 online learning
- Industry leading keynote speakers
- Panel discussions and lectures specific to your regional requirements
- Follow-up assessment questions, to ensure that your educational gaps have been met

Our online, pre-course self-study program ensures that you get the most value out of your course

Collaborate with more group discussions and hands-on osteosynthesis exercises

Benefit from increased interaction between participants and expert faculty members

Our three-step approach:

1.

Online preparation

Four weeks prior the live event, participants are required to complete a self-assessment and an online self-study program

2.

Face-to-face event

The live, two-day event is a combination of educational lectures, small group discussions, practical exercises, and exceptional keynote lectures

3.

Online follow-up

To facilitate future improvement, participants will be asked to complete an online evaluation upon completion of the course

About AOCMF

We are the voice and professional resource for individuals working in the field of craniomaxillofacial trauma, orthognathics, and reconstruction. Our community promotes a unique culture of teaching and learning, combined with research and development. As a leader in the industry and a frontrunner in teaching and implementing the latest strategies and techniques, AOCMF provides over 120 educational opportunities and courses to more than 7,000 passionate surgeons worldwide. Through continuing education, we accelerate your success!

AOCMF is a division of the AO Foundation, a medically guided, non-profit organization led by an international group of surgeons specialized in the treatment of trauma and disorders of the musculoskeletal system.
