COURSE OVERVIEW

One of the longest-running courses of its kind, the UCLA Intensive Course in Geriatric Medicine is a four-day course and board review in geriatric medicine that emphasizes an evidence-based and functional approach to the comprehensive care of older adults. It is designed for health professionals who wish to enhance their ability to care for older adults, and for physicians who are preparing for the initial certification or re-certification examinations in Geriatric Medicine offered by the American Board of Internal Medicine (ABIM) and the American Board of Family Practice (ABFP).

- The 34th Annual UCLA Intensive Course is presented concurrently with the 2017 Intensive Course in Geriatric Pharmacy and Board Review, and participants may attend sessions in either course.
- Speaker presentations and supplementary materials are provided in a searchable and annotatable PDF syllabus.
- Over nine hours of optional interactive board review sessions are offered.
- Three interactive preconference workshops on a variety of topics including geriatric cardiovascular diseases, transitions in care, and complementary and alternative medicine.

LEARNING OBJECTIVES

At the conclusion of this course, participants should be able to:

- Identify the basic principles of geriatric medicine
- Apply principles of geriatric assessment, geriatric pharmacology, rehabilitation, and long-term care to the patient care setting
- Understand key aspects of neurology, cardiology, psychiatry, urology, hematology, gastroenterology, nephrology, endocrinology, pharmacology, and rheumatology as they apply to older patients
- Identify psychosocial problems and ethical issues in decision-making, and formulate an approach to these problems
- Comprehend the major geriatric syndromes such as incontinence, pain management, osteoporosis, and explain the appropriate geriatric medicine approaches to them

INVITATION FROM THE CHAIR

For over 3 decades, the UCLA Intensive Course in Geriatric Medicine has been the preeminent conference for health professionals who provide clinical care for older adults. This year, we will cover a broad range of topics in geriatric primary and specialty care, delivered by recognized experts in the field. For those who can come a day earlier, we offer outstanding workshops in geriatric cardiology, complementary medicine and care transitions. For the first time in its illustrious history, the course will be held in a newly built venue at the center of the UCLA campus. We will be very glad if you can join us!

PROGRAM SCHEDULE

PRECONFERENCE SESSIONS

TUESDAY, SEPTEMBER 12

<https://geronet.ucla.edu/ic/pre-con>

PRECONFERENCE SESSIONS (additional \$100 fee per half-day session applies)

- 8:00 – 12:00** **Complementary & Integrative Medicine in Geriatrics**
Helen Lavretsky, MD, MS
This workshop will provide an overview of diverse techniques like the use of supplements, mind-body therapies, and the use of acupuncture and traditional Chinese medicine for management of mental and physical disorders of aging, and will be accompanied by brief experiential exercises to be used in clinical practice.
- 1:00 – 5:00** **Care Transitions Boot Camp: Providing Value vs. Volume to Improve Clinical Outcomes**
Michelle S. Eslami, MD, FACP, CMD
The aim of this workshop is to provide the learner with evidence-based tools and strategies to improve patient care transitions to and from post-acute sites. Participants will learn ways to improve patient outcomes such as 30-day readmissions, ED visits and length of stay.
- 8:00 – 12:00 (Part A)** **Management of the Geriatric Patient in an Era of Advanced Cardiac Interventions (Part A and B)**
Eric Yang, MD | Marcella Calton Press, MD, PhD | Deena Goldwater, MD, PhD
and/or
1:00 – 5:00 (Part B) Cardiovascular disease (CVD) is the leading cause of death and major disability in older adults. This comprehensive two-part program highlights the recent medical literature and evidence-based guidelines in caring for CVD in the geriatric population, and provides an exciting glimpse into the exponential rise in percutaneous repair/ replacement technologies in structural heart disease.

The morning session (Part A) will focus on valvular disease and frailty while the afternoon session (Part B) will discuss common challenges to geriatric cardiology, including topics on anticoagulation, carotid artery disease, congestive heart failure, and implantable cardioverter defibrillators. You may choose to attend one or both sessions.
