

Medical students receive 2–10 hours
of education about substance use disorder,
a disease that strikes 1 in 12 American adults.*

*2017 National Survey on Drug Use and Health (Substance Abuse and Mental Health Services Administration)

The Hazelden Betty Ford Foundation is a force of healing and hope for individuals, families and communities affected by addiction to alcohol and other drugs. As the nation's leading nonprofit provider of comprehensive inpatient and outpatient treatment for adults and youth, the Foundation has 17 locations nationwide and collaborates with an expansive network throughout health care. With a legacy that began in 1949 and includes the 1982 founding of the Betty Ford Center, the Foundation today also encompasses a graduate school of addiction studies, a publishing division, an addiction research center, recovery advocacy and thought leadership, professional and medical education programs, school-based prevention resources and a specialized program for children who grow up in families with addiction.

MAT-1084 55801 (3/20) © 2020 Hazelden Betty Ford Foundation

We have specialized educational programs that inform care professionals, along with health and medical providers, about addiction prevention, assessment, treatment and recovery. Contact us at MPF@HazeldenBettyFord.org to learn more.

Together, we will
overcome addiction.

IS IT ADDICTION?

Learn how to recognize substance use disorders
and understand the implications for the health
and well-being of your patients.

Course on Addiction & Recovery Education (CARE)

An online course for medical students
and practitioners

Hazelden Betty Ford
Foundation

Course on Addiction & Recovery Education (CARE)

The CARE online curriculum, in partnership with the NYU Grossman School of Medicine, prepares medical students and practitioners to identify, intervene in and address substance use disorders with their patients.

Course Benefits

Course participants can expect:

- An intuitive interface that keeps their experience simple and easy
- Interactive learning formats that keep them engaged
- Customizable modules to keep their learning focused on the most relevant content

6

Case Studies

Virtual patient profiles provide opportunities for clinical consideration.

Topics include:

- Pregnancy and Alcohol Use
- Cannabis Use in Adolescents
- Pain Management and Liability for Addiction
- Alcohol Withdrawal
- Dermatology and Stimulant Use
- IV Heroin Use and HIV

14

Video Modules

TED-style videos feature clinical best-practices from leading experts in addiction.

Topics include:

- Neurobiology of Addiction
- Psychiatric Comorbidity
- Epidemiology of Addiction
- Evidence-Based Behavioral Therapies
- Medication in the Treatment of Addiction
- Genetics in Alcohol and Substance Use Disorders

“Training in medical school is essential to ground future doctors with the belief that addictions are common, chronic illnesses.”

R. Jeffrey Goldsmith, MD, DLAPA, FASAM
Former President of the American Society of Addiction Medicine

The CARE Story

The Course on Addiction & Recovery Education (CARE) was developed by Hazelden Betty Ford in collaboration with MedU (now Aquifer), the American Society of Addiction Medicine and the Treatment Research Institute to address the need for education about substance use disorder in medical schools. In 2020, the NYU Grossman School of Medicine partnered with Hazelden Betty Ford to address this need and expand the reach of this timely curriculum. By hosting CARE within NYU Grossman's suite of online learning modules, physicians will be properly trained and better positioned to serve patients with substance use disorders, improve the quality of care and reduce the overall costs of health care.
