Minimizing the Diversity

"Approaching New Era of Personalized Surgery"

8 - 11 September 2021
Indonesia

PRESIDENTIAL LECTURE

This is a **state-of-the-art presentation of highly topical and timely subject in HPB surgery**, addressed to all Congress delegates. Leading international speaker, with considerable expertise in the subject at hand, has been invited to conduct this Presidential Lecture. This motif is scheduled at "prime time" in the program, unopposed to other activities, to achieve maximum attendance.

INSPIRATIONAL FIGURE

Mark on your calendar – a not-to-be-missed opportunity to meet virtually with some of the most inspirational figure of surgeons in our field who have stamped their mark on the field of HPB surgery and might inspire us to follow their path. Each will speak on a separate topic reflecting their career's passion in exclusive plenary sessions throughout the Congress.

MEET THE EXPERT

Meet the Expert sessions allow delegates to meet in a group with **renowned researchers and clinicians who are an expert in HPB services**. The format is designed to facilitate informal discussions, allowing participants to present their questions and gain new perspectives.

SYMPOSIA

Symposia are significant educational sessions aimed at critically reviewing diverse aspects of a specific topic. Moderators will oversee between 2-3 focused talks which probe the depth of the topic. The target audience consists of delegates who are primarily interested in the subject or wish to update their knowledge in the area. Audience interaction will be prominent with robust "Question and Answer" opportunities. **Many of the symposia will feature Multidisciplinary, Technical, or Scientific themes.**

DEBATES

Debates allow speakers to **debate controversial topics** in an attractive format which provides "food for thought". Questions for which we have no good answers yet are featured. This motif is always lively and entertaining. The faculties chosen for these sessions are highly acclaimed clinicians with a passion for their positions.

PANEL SESSION

Don't forget to join this panel session, **the one and only session which presents many extraordinary Women in HPB Surgery** from many countries. Really encourage the women surgeons to gain more knowledge and sharing experience from these faculties
