NeuroVision Training Weekend

15-16 September 2018

Sheraton Hotel, Melbourne

WELCOME

On behalf of the organising committee we are delighted to invite you to participate in the 2018 Neuro-Ophthalmology Society of Australia 34th Annual Clinical and Scientific meeting and the NeuroVision Training Weekend.

The conference venue will be the Sheraton Hotel, Melbourne.

The meeting will take place on Thursday 13th & Friday 14th September & the NeuroVision Training weekend follows on Saturday 15th & Sunday 16th September, 2018.

The NOSA dinner will be held at Cumulus on Thursday 13th September and the NeuroVision dinner will be held on Saturday 15th September at Longsong.

We look forward to you joining us in Melbourne.

Brent Gaskin (FRANZCO) & Neil Shuey (FRACP)
NOSA Clinical & Scientific Meeting Convenors

GUEST SPEAKERS

This year's NOSA meeting will be held in Melbourne on the 13th and 14th of September, and will be immediately followed by the NeuroVision training weekend on the 15th and 16th of September. We are privileged to have a high quality international invited faculty again this year.

Mr Tim Matthews, FRCOphth
Consultant Ophthalmologist
Birmingham Neuro-Ophthalmology Unit
University Hospitals Birmingham NHS Foundation Trust
Birmingham, UK

Mr Tim Matthews is familiar to the Australasian ophthalmology and neuro-ophthalmology community having trained no less than 7 local fellows. He has vast clinical experience from nearly 20 years work in one of Europe's busiest neuro-ophthalmology units. He will present on IIH - lessons from the IIHTT, myasthenia gravis, and advances in skull base surgery and neuro-imaging.

Professor Prem Subramanian, MD, PhD
Professor of Ophthalmology, Neurology, and Neurosurgery
University of Colorado School of Medicine
Denver, Colorado

Professor Subramanian has held previous clinical and academic appointments at Johns Hopkins University, and is now division chief of ophthalmology, and professor of ophthalmology, neurology and neurosurgery at the University of Colorado. He is at the forefront of North American neuro-ophthalmology. He will lecture on a selection of his research interests – Giant cell arteritis, brain injury and visual dysfunction, and thyroid eye disease.

We look forward to welcoming you all to Melbourne in September for what should be a stimulating and highly informative NOSA meeting.
