

Advanced Skills in Laparoscopic Gynecologic Surgery

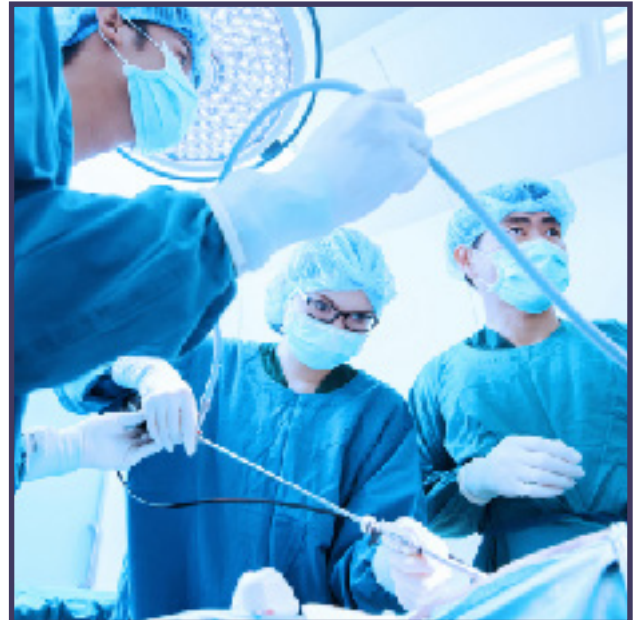

Introduction

The Advanced Skills in Laparoscopic Gynecologic Surgery course is designed for gynecologic surgeons seeking to enhance their expertise in advanced minimally invasive techniques. Through an intensive, hands-on program led by internationally recognized faculty, participants will gain in-depth understanding of operative setup, surgical principles, and complex laparoscopic procedures. This course combines evidence-based lectures, expert demonstrations, and cadaveric dissection to provide participants with a comprehensive and practical learning experience in advanced laparoscopic gynecology.

Course Objectives

By the end of the course, participants will be able to:

- Demonstrate safe and effective laparoscopic entry techniques.
- Apply best practices in operative theatre setup and equipment handling.
- Perform advanced laparoscopic procedures for gynecologic surgery, including suturing and dissection.
- Manage intraoperative challenges and complications with appropriate strategies.
- Integrate advanced laparoscopic skills into routine clinical practice to improve patient outcomes.

Target audience

Gynecologists,
Residents, and trainees

✓ CME – Under Application with SHA

This course is intended for

- Practicing gynecologists and obstetricians with prior experience in basic laparoscopy who wish to advance their surgical skills.
- Senior residents and fellows in gynecology seeking structured hands-on training in advanced laparoscopic techniques.
- Surgeons with an interest in minimally invasive gynecologic procedures aiming to expand their operative repertoire.
- Healthcare professionals involved in surgical training and education in gynecology.

Program outline

✓ Day 1 09:00 am–17:00 pm		
Time	Topic	Faculty
09:00-09:15	Laparoscopic Entry techniques	Prof. Mauel M Ianieri, Italy
09:15-09:45	Operative theatre set up and equipments	GESEA Instructor
09:45-10:15	Laparoscopic Anatomy in Hystrectomy	Prof. Laurent De Landsheere, Belgium
10:15-10:30	Coffee Break	
10:30-10:45	Laparoscopic Myomectomy	Prof. Rajesh Devassy, UAE
10:45-11:15	Laparoscopic Pelvic Organ Prolapse (POP) surgery	Prof. Giovanni Panico, Italy
11:45-12:30	Basic principles & practice of Laparoscopic suturing	Prof. Rajesh Devassy, UAE
1230-1330	Lunch Break	
13:30-16:30	Hands-on Session, Dry lab : ESGE ACADEMY - GESEA Training - Level 1 / Level 2	Prof. Rajesh Devassy, UAE
	Laparoscopic Skills Training and Testing method (LASTT)	GESEA Instructor
	Suturing and knot tying Training and Testing method (SUTT)	GESEA Instructor
16:30-17:00	Practicing Suturing skills on Tissue	Prof. Giovanni Panico, Italy
	Optional lecture: Essentials to know in Endometriosis Surgery	Prof. Mauel M Ianieri, Italy
✓ Day 2 08:30 am–16:00 pm		
Time	Topic	Faculty
08:30-09:00	Coffee	
09:00-13:00	Live Tissue Hands-on	Prof. Rajesh Devassy, UAE
	Description of Live Animal lab Surgery -1 (Ovarian cystectomy, salpino-oophorectomy)	Prof. Giovanni Panico, Italy
	Description of Live Animal lab Surgery -2 (Hysterectomy)	Prof. Rajesh Devassy, UAE
	Description of Live Animal lab Surgery -3 (Pelvic floor repair)	Prof. Giovanni Panico, Italy
13:00-14:00	Lunch Break	
14:00-16:00	Dry lab: Practicing Suturing skills on Tissue models	Prof. Rajesh Devassy, UAE
	Live animal lab: Tubal anastomosis, Bladder, Bowel & Ureter repairs	Prof. Giovanni Panico, Italy
