

Immunology and Immunodeficiency in Childhood

GREAT ORMOND STREET
INSTITUTE OF CHILD HEALTH

Great Ormond Street
Hospital for Children
NHS Foundation Trust

Course Directors: Dr Claire Booth and Dr Austen Worth

Course Organiser: Dr Zohreh Nademi

A course suitable for general paediatricians, providing an update of the recognition of primary immunodeficiency, management of immunocompromised patients, new immunomodulatory therapies, including monoclonal antibody therapies, and the science underlying these topics.

Topics to be covered

- When you should suspect immunodeficiency
- How to find out if something's wrong
- Immunoglobulin therapy
- Haematopoietic stem cell transplant and gene therapy
- Newborn screening
- Management of infection in the immunocompromised patient

Aims of the course:

- Make immunology accessible for general paediatricians
- Give confidence in identifying and managing patients with primary immunodeficiency (PID)
- Understand diagnoses and management of common PIDs
- Feel comfortable caring for children post bonemarrow transplant
- Insight into newer treatments and those being introduced

Fees:

Early Bird: £140 (before 25/01/19)

Standard fee: £175

GOSH internal fee: (GOSH staff must email ich.events@ucl.ac.uk from their GOSH account for discount code)
