

HP6 Hepatology Review

Price: \$580.00

Register: (866) 611-5599 or www.AmericanSeminar.com

**Special Association accreditation may vary. See website.*

**Osteoporosis /Nonalcoholic Steatohepatitis -
Kaitlyn Barrett, DO and Julio Gutierrez, MD**

List the clinical indications for osteoporosis treatment; Explain the osteoporosis treatment algorithm used in practice; Cite pharmacologic therapies for high-risk and very highrisk patients with osteoporosis; Distinguish between nonalcoholic fatty liver disease and NASH; Optimize management of NASH using pharmacologic and lifestyle interventions.

FP 69 - 14

**Management of Hepatitis /Prevention of Suicide -
Marsha Kay, MD and Jonathan Warus, MD**

Recognize risk factors for viral hepatitis in the pediatric population; Manage viral hepatitis infection through the use of vaccines and appropriate pharmaceutical drugs; Determine predictors of response and prognosis in patients with viral hepatitis; Detect trends in adolescent suicidality; Implement strategies to prevent, recognize, and appropriately respond to youth reporting suicidal ideation.

PD 67 - 28

**Liver Disease and Injury - Deborah Kahal, MD
and Peter S. Buch, MD**

Monitor disease progression in hepatitis B and C using serologic markers; Recommend lifestyle modifications and treatments to prevent transmission and progression of hepatitis B and C; Interpret screening results to determine appropriate treatment strategies for hepatitis B and C; Distinguish among phenotypes of drug-induced liver injury; Identify risk factors for drug-induced liver injury

FP 69 - 38

**Developments in the Treatment of Liver Disease -
Steven K. Herrine, MD, Jonathan M. Fenkel, MD
and Manish Thapar, MD**

Evaluate data comparing the combined transplant hepatology program to the standard training pathway; Determine whether a patient encounter can be handled via telemedicine; Outline the iron transport process; Recognize causes of hepcidin suppression; Use laboratory values and findings on magnetic resonance imaging to distinguish among different iron overload disorders

GE 35 - 23

**Liver Transplantation/Polypectomy/Endoscopy -
Christopher J. Sonnenday, MD, Jerome D. Waye,
MD and Nikhil A. Kumta, MD**

Identify the clinical challenges of liver transplantation; Recognize the importance of donation after cardiac death in liver transplantation; Choose the most appropriate approach for polypectomy; Manage bleeding and other complications of endoscopy; Select the most appropriate device for closure of a perforation during endoscopy or colonoscopy.

GE 35 - 12

**Jaundice and Cholestasis/Acid-base Disorders -
Vera Hupertz, MD and Raed Bou Matar, MD**

Recognize signs and symptoms of jaundice and cholestasis in neonates; Differentiate among conjugated and unconjugated hyperbilirubinemia and associated conditions in infants; Treat various manifestations of liver dysfunction and failure in children; Identify different types of acid-base disorders in children; Analyze laboratory findings for indications of acid-base disorders in children.

PD 67 - 31

**Liver Disease - Dina Halegoua-DeMarzio, MD,
Nadege T. Gunn, MD and Sonali Paul, MD**

Perform a diagnostic workup for patients at high risk for nonalcoholic fatty liver disease (NAFLD); Develop management strategies for NAFLD to reduce risk for progression to cirrhosis and hepatocellular carcinoma; Identify common pitfalls in diagnosis and treatment of common liver diseases; Create management strategies for follow-up and treatment of patients with common liver diseases; Diagnose and treat common immune-mediated liver diseases.

GE 35 - 22

HP6 Hepatology Review

Price: \$580.00

Register: (866) 611-5599 or www.AmericanSeminar.com

**Special Association accreditation may vary. See website.*

**Guidelines Update/Nonalcoholic Fatty Liver
Disease - Juan A. Dumois, MD and Ann O.
Scheimann, MD**

Adopt an appropriate strategy for fluoride use in preventing dental caries; Recognize the risk for Lyme disease with tick bites in different regions of the United States; Treat congenital cytomegalovirus infection according to the latest guidelines; Choose an appropriate modality of noninvasive imaging in the management of nonalcoholic fatty liver disease in children; Stress the importance of lifestyle modifications for effective management of nonalcoholic fatty liver disease.

PD 67 - 48

**Colorectal Cancer/Liver Trauma - Federico
Aucejo, MD, Eren Berber, MD, Sudha Amarnath,
MD, David Liska, MD and Elizabeth R. Benjamin,
MD**

Apply appropriate selection criteria for liver transplantation in patients with metastatic colorectal cancer; Employ laparoscopic techniques to address colorectal cancer metastases to the liver; Elaborate on the benefits of total neoadjuvant chemotherapy for the treatment of colorectal cancer; Implement strategies for timely diagnosis of young-onset colorectal cancer; Establish control of hemorrhage in patients with severe liver injuries.

GS 69 - 01

**Colorectal Cancer Update from the Cleveland
Clinic - Sudha Amarnath, MD**

Elaborate on the potential advantages and disadvantages of TNT for colorectal cancer; Cite current literature addressing the effectiveness of TNT; Assess tumor response to TNT with endoscopic modalities; Engage patients in shared decision-making regarding surgery or a watch-and-wait strategy for management of colorectal tumor regrowth; Identify appropriate candidates for liver transplantation to treat liver metastases from colorectal cancer.

ON 13 - 02
