

Wound Care Management Program

COURSE DESCRIPTION

This course offers an evidence-based approach to wound management to help clinical staff stay current with the standards of care and sharpen their bedside skills, clinical judgment. It also offers a unique dimension by including a core curriculum of professional practice content specifically pertinent to wound care programs and incorporating the latest standards of practice and patient centered drivers. The course is offered by dynamic instructors and trainers who use engaging teaching methods proven to help learners retain material.

TOPICS COVERED

This course is divide into a clinical and professional practice component.

The clinical component will cover the anatomy and physiology of the integumentary system, wound pathology and the wound healing process. Discuss the principles of management for a variety of wounds, appropriate measures of care for each, and various dressing/treatment plans for a wound based on exudate, wound status, and available wound products.

The professional practice component will cover how to formulate effective wound care plans, provide patient centered education for patients requiring wound management, the application of telehealth for enhanced wound care, understand the relevance of wound care safe nurse staffing, and quality improvement for a comprehensive wound management program.

COURSE LEARNING OBJECTIVES

- Enable the learner to successfully implement current therapeutic guidelines and best practices to patients requiring wound care through interprofessional collaborative practice.
- Build learner clinical judgement to initiate measures of care pertinent to each wound type.
- Build the professional practice capacities of the learners in key concepts for an integrated wound care management program.

TARGET AUDIENCE

- Experienced registered nurses (proficient or expert as per Patricia Benner's Model) aspiring to be in nursing leadership role
- Registered nurses preparing to be professionally certified in wound management
- Prospective nurse managers of wound care unit or program

PARTICIPANTS EVALUATION

The following methods will be used to deliver the course and engage participants in the learning process:

- Powerpoint presentation
- Mental simulation by case study discussion
- Discussion forum
- Mental simulation by video vignette discussion
- Practice exercises
- Reflective practice exercises

PROGRAM SCHEDULE - 16 CONTACT HOURS / 4 DAYS

DAY 1

Course Introduction and learning need confirmation - **Rana Abdel Malak, PhD**

Skin Anatomy and Physiology - **Nadine El Hakim, RN**

Wounds and wounds healing phases - **Nadine El Hakim, RN**

DAY 2

Guidelines and Assessment tools for Wounds: - **Nadine El Hakim, RN**
NHS/WHO/EWMA/ICW/IWII
T.I.M.E/Braden/Norton/Push

Wound Types and matching Treatment modalities (Part 1) - **Nadine El Hakim, RN**

DAY 3

Wound Types and matching Treatment modalities (Part 2) - **Nadine El Hakim, RN**

Pressure Ulcer Care Planning and Patient and Family education standards - **Rana Abdel Malak, PhD**

Telehealth use in wound care - **Rana Abdel Malak, PhD**

DAY 4

Essential elements for an effective wound care program and safe staffing consideration - **Rana Abdel Malak, PhD**

Measuring and Monitoring for performance improvement in Wound care - **Rana Abdel Malak, PhD**

The Trainer
