

PRELIMINARY PROGRAM
THOMAS L. PETTY
ASPEN LUNG CONFERENCE
62nd Annual Meeting
June 5 - June 8, 2019

***“Exploring New Therapeutic Pathways in Pulmonary Hypertension:
Metabolism, Proliferation, and Personalized Medicine”***

M. Patricia George, M.D., Chair

Brian Graham, M.D., Chair

TOPICS AND STATE OF THE ART SPEAKERS

“Altered Metabolism in PAECs and the RV”

Serpil C. Erzurum, M.D.

Cleveland, Ohio

***“Immunologic and Metabolic Alterations in a Nonhuman Primate
Model of Pulmonary Hypertension”***

Karen A. Norris, Ph.D.

Athens, Georgia

“Autophagy in Cancer and Pulmonary Hypertension”

Augustine M.K. Choi, M.D.

New York, New York

“Metabolism as a Therapeutic Target in Pulmonary Hypertension and the RV”

Anna R. Hemnes, M.D.

Nashville, Tennessee

“Hypoxia Signaling in Cancer”

M. Celeste Simon, Ph.D.

Philadelphia, Pennsylvania

“Hypoxia Signaling in Pulmonary Hypertension”

Larissa A. Shimoda, M.S., Ph.D.

Baltimore, Maryland

“Angiogenesis in Cancer”

Peter Carmeliet, M.D., Ph.D.

Leuven, Belgium

“BMPR2 Signaling in Pulmonary Hypertension Angiogenesis”

Marlene Rabinovitch, M.D.

Stanford, California

“Transcription Factor Regulation of Pulmonary Hypertension and Cancer”

Soni S. Pullamsetti, Ph.D.

Bad Nauheim, Germany

“Novel Targets in Pulmonary Hypertension”

Steven M. Kawut, M.D., M.S.

Philadelphia, Pennsylvania

“Personalized Medicine in Cancer”

Tatiana M. Prowell, M.D.

Baltimore, Maryland

“Bridging Genes to Phenotype in Pulmonary Hypertension”

Mark W. Geraci, M.D.

Indianapolis, Indiana

CONFERENCE SUMMARY

Mark T. Gladwin, M.D.

Pittsburgh, Pennsylvania
