

TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

Program Description

Unlike trauma education programs targeted at prehospital and emergency care providers, the Trauma Care After Resuscitation (TCAR) course is specifically designed for acute care, critical care, and perioperative nurses.

This live, 2-day program gives inpatient bedside care providers the foundational, evidence-based information and critical thinking skills necessary to meet regulatory requirements and provide excellent care to this challenging patient population.

RATHER THAN UNIT-SPECIFIC PSYCHOMOTOR COMPETENCIES, THE TCAR COURSE EMPHASIZES KNOWLEDGE ENHANCEMENT AND CLINICAL REASONING SKILLS.

A TRAUMA FUNDAMENTALS COURSE DESIGNED FOR INPATIENT NURSES

Program Overview

PART 1

Participants focus on concepts relevant to the nursing care of the injured, hospitalized patient:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

PART 2

Learners apply information from Part 1 by participating in interactive expanding case scenarios that focus on the admission to discharge care of patients with injuries to various body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic injury
- Abdominal injury
- Musculoskeletal injury
- Craniocerebral injury
- Spine & spinal cord injury

Continuing Education

TCAR Education Programs (a division of Visionem Inc.) is accredited as a provider of continuing nurse education by the American Nurses Credentialing Center's Commission on Accreditation. Continuing education hours are also provided through Visionem Inc., a provider approved by the California Board of Nurse Registered Nursing, Provider Number CEP 15483. To receive a certificate of completion, learners must submit an online course evaluation and attend 2 class days (14 contact hours) or 1 day (7 contact hours).
