A Contemporary Approach to Diagnosis, Treatment Planning and Therapy in

PERIODONTICS

Friday, November 16, 2018
9:00 am - 5:00 pm

★ Life-Long Tradition and Excellence ★

SPEAKERS

Ziv Simon, DMD, MSc

Dr. Simon obtained his DMD degree from Tel Aviv University School of Dental Medicine and his certificate in periodontics from the University of Toronto. He is a Diplomate of the American Board of Periodontology and a Fellow of the Royal College of Dentists of Canada. Dr. Simon is the Founder of the Beverly Hills Multidisciplinary Dental Study Group and the Dental Hygiene Study Club of Beverly Hills. He publishes and lectures on implant dentistry, esthetics and guided surgery and is a reviewer for the Journal of the California Dental Association. He teaches at the Herman Ostrow School of Dentistry of the University of Southern California and conducts hands-on surgical courses nationally and internationally. Dr. Simon maintains a private practice limited to periodontics and dental implants in Beverly Hills, California. He is the creator of *SurgicalMaster™*, a surgical training program for dentists.

Ilan Rotstein, DDS

Dr. Rotstein is Professor and Chair of the Division of Endodontics and General Practice Residency and Associate Dean of Continuing Education at the Herman Ostrow School of Dentistry of USC. He has been Chair of the Research Committee of the International Federation of Endodontic Associations and past member of the Research and Scientific Affairs Committee of the American Association of Endodontists. Dr. Rotstein published more than 150 scientific papers and textbook chapters in the dental literature and has lectured extensively nationally and internationally in more than 25 countries.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

SYNOPSIS

Periodontal disease is a chronically destructive condition affecting many patients. The primary bacterial etiology with several possible local and systemic risk factors account for a rather complex disease entity. It is crucial for clinicians to include periodontal considerations in their treatment planning and in the active phase of therapy.

This course is designed to provide clinicians with the most current knowledge on fundamental issues in periodontics. Participants will learn how to diagnose periodontal disease and related conditions and to assess teeth prognosis. The course will also explore several periodontal treatment modalities and their relation to restorative and reconstructive aspects of treatment. State-of-the-art reviews and position statements by the American Academy of Periodontology (AAP) will be included.

The information presented in this course will be clinically-relevant to help participants provide optimal comprehensive care for their patients.

TESTIMONIALS

"Both lectures were very helpful to me - I work in a community health center. Practical information to help in treatment of the underserved."

- Dr. David Breese

"Tons of information! Very relative information! I have been searching for a course on this subject matter for some time. I am so glad and thankful that you are covering these subjects. They really are the basics that we all need to be confident about. As a hygienist, it is so pertinent. Thank you."

- Deirdre Herman, RDH

Participants are cautioned about the potential risks of using limited knowledge when integrating new techniques into your practices.

TOPICS TO BE DISCUSSED

- Microbial etiology of periodontitis
- Secondary etiologies and risk factors
- Performing a comprehensive periodontal examination
- Classification of periodontal diseases and conditions (AAP)
- Differential diagnoses: periodontal, endodontic and combined lesions
- How to determine prognosis?
- Systemic and localized antibiotic regimens: when is each one indicated?
- The relationship between occlusion and periodontal disease
- The furcation dilemma: What are the treatment options?
- Periodontal disease and the link with systemic diseases
- Surgical vs. non-surgical treatments: when are they indicated?
- Gingival lesions and indications for biopsy
- What is appropriate periodontal maintenance?
- When to refer to a specialist (AAP)

* This course is intended for general dentists, periodontists, prosthodontists, oral surgeons, endodontists, dental hygienists, and other members of the dental team.
