Abstract

The 2-day course will be a mix between evidence and based lecturing and hands-on training.

The lecture will give an in-depth overview of the steps in chronological, order starting from planning all the way to delivery and post-op. The occlusion, advanced colour theory, and choice of materials will be discussed. During the hands-on part, the participants will experience how to design different tooth preparations and provisionalisation which will end with cementation.

This course is designed to elevate the skills of clinicians who already have done veneer cases in addition to building a strong base for dentists who intend on starting with veneer cases.

Learning Objectives

- Plan veneer treatment cases.
- Simplified digital smile design.
- Execute precise preparation, impression and provisionalisation techniques in different scenarios.
- Execute proper bonding.
- Design and adjust to achieve proper occlusion.
