Pediatric Cardiovascular and Pulmonary Development & Assessment

Ashley E. Parish, PT, DPT, CRT, CCS

Course Objectives:

- Understand fetal development of the heart and lungs in order to formulate an assessment of the pediatric cardiovascular and pulmonary systems
- Demonstrate knowledge of the relationship between the cardiovascular and pulmonary systems
- Perform a cardiovascular and pulmonary assessment on typically developing infants, toddlers, children, and adolescents
- Differentiate appropriate tests and measures for the cardiovascular and pulmonary systems based on age of the patient/client
