

Series 1

Essential Dermatology 2016

Everyday Skin Management for Primary Care

This meeting series has received sponsorship funding from Stiefel, a GSK Company
Johnson & Johnson and Dermal

Essential Dermatology Series 1 for GPs

- Up to 25% of all GP consultations relate to the skin
- Dermatology is an area of medicine that is facing major changes from secondary to primary care
- The majority of GPs have little or no training in dermatology
- Hospital referral rates for dermatology are consistently high
- Open to all members of the primary care team

The Primary Care Dermatology Society is an independent educational organisation of GPs with an interest in dermatology. We have more than 3000 members nationwide representing GPs as well as GPwSIs.

For 20 years we have provided a comprehensive and varied mixture of educational meetings for our members and additional day long meetings for those with limited knowledge in dermatology e.g. VTS, new GPs as well as those who missed out on dermatology training.

This series of full day Essential Dermatology Series 1 & 2 meetings, is in response to demands of VTS organisers and those involved in developing primary and intermediate care services. The programme covers the essential information to enable members of the primary care team to cope with the vast majority of conditions encountered in day-to-day general practice. Essential Dermatology Series 2 covers a wider range rather than a more complex level of topics.

Stephen Kownacki
PCDS Executive Committee Chairman
