The Ninth Annual Royal Marsden Head and Neck Conference:

“Head and Neck Cancer – the shape of things to come?”

Introduction

Dear Colleagues

After the success of the last eight years it is with great pleasure that you are invited to participate in the ninth annual head and neck study day. This year we have chosen to look into the future and explore some of potential advances that might occur in the management of head and neck cancer over the next decade. The meeting assembles some of the country's leading experts to critically discuss the evidence base for topics as diverse as immunotherapy, metastasectomy, image-guided surgery, adaptive radiotherapy and advances in imaging. The meeting will be of particular interest to maxillofacial, ENT or plastic surgeons with an interest in head and neck oncology, as well as clinical/medical oncologists, radiologists and pathologists. Our invitation is extended to consultants and trainees alike, as well as other members of the multidisciplinary team. The meeting will be interactive with ample opportunity to discuss the evidence presented.

Mr Cyrus Kerawala

Consultant Maxillofacial/Head and Neck Surgeon
The Royal Marsden NHS Foundation Trust

Conference Aims

This course aims to build on the successes of the last eight years and will explore the potential changes that might take place in the management of head and neck malignancy in the years ahead. The day will consist of evidence-based lectures that will focus on advances in diagnosis, staging, surgery, radiotherapy and systemic treatments. The afternoon will conclude with a case-based discussion that will be used to highlight some of the issues discussed throughout the day.

Topics to Include

- Advances in imaging
- Immunotherapy and genomic sequencing
- Image-guided surgery
- Surgical management of oligometastatic disease
- Adaptive radiotherapy
