June 25 – 28

RITZ CARLTON — NAPLES, FL

FEATURED Speaker:

GIULIO RASPERINI, DDS, FACP

Dr. Rasperini is at the Department of Biomedical, Surgical and Dental Sciences, University of Milan, Milan, Italy, and part-time Faculty at Harvard School of Dental Medicine, Boston.

Dr. Rasperini received his D.D.S. from the University of Pavia in 1990, his certificate of specialist in Orthodontics from the University of Milan in 1997, his certificate as Active Member of the Italian Society of Periodontology and Implantology in 1997. He later received his certificate as Active Member of the European Academy of Esthetic Dentistry in 2009, Full member British Academy of Aesthetic Dentistry 2015-2022, Italian Academy of Osseointegration in 2022, Board member of the International Academy of Periodontology 2023-actual

Dr. Rasperini is member of the Editorial Board of the International Journal of Periodontics & Restorative Dentistry and is ad hoc reviewer in the editorial boards of multiple journals.

He has published over 129 papers on PubMed, h-index 53 and more than 10K citations. He lectured extensively in the five Continents in the fields of Periodontology and Implantology, Regenerative Medicine, Surgical techniques for periodontal and peri-implant tissues reconstruction.

Winner of Awards for research with his co-workers: International Quintessence Publishing Award, Goldman Prize, Clinical Research Award, Earl Robinson Periodontal Regeneration Award, Align Research Award.

He is the founder of the iPerio Education Center in Piacenza, Italy, where he teaches his philosophy of treatment and concepts of the modern dentistry.

EVOLUTION PERIODONTAL REGENERATIVE TECHNIQUES, FROM GTR TO THE USE OF BIOLOGICS AND CTG WITHOUT INCISION OF THE PAPILLAE

8 HOURS OF CE LECTURE, SUBJECT CODE 490

COURSE OVERVIEW

In today's dentistry the aesthetic demand from the patients has become the main challenge in Periodontology. Besides the obvious functional results is now important to achieve aesthetic success, particularly in the anterior areas, where the expectations of the patients are higher.

Understanding the biology of the periodontal wound healing, will lead to respect and protect the healing phase. The New Classification of Periodontal Disease is focused on the interdental Clinical Attachment level. The Aim of Classic Periodontal reconstructive surgical techniques is the regeneration of the infrabony defects or the root coverage in case of gingival recessions. Recently the evolution of the regenerative plastic surgery makes possible to treat simultaneously both and the interproximal attachment.

Having the base of the classic periodontal regenerative technique and combining the knowledge of mucogingival modern surgical approach it is possible to apply novel techniques, using proper biomaterials to answer to the patient's demands and regenerate the interdental attachment of compromised teeth with predictable long-term results.

Ritz Carlton | Naples, FL June 25-28, 2026

280 Vanderbilt Beach Rd..
Naples, FL 34108 | 239-598-3300
