

CPR BLS RENEWAL FOR THE HEALTHCARE PROVIDER

Cardiac arrest requires immediate and effective response by the dentist and their staff if the victim is to survive. That is why the Dental Board of California requires successful certification in Basic Life Support (BLS) for all dentists and dental employees at least once every two years. The Los Angeles Dental Society CPR course follows the American Heart Association's guidelines and satisfies the BLS requirement by providing instruction in:

- Foreign-body airway obstruction
- Relief of choking for adults, children and infants
- Use of automated external defibrillation with CPR

The course concludes with live, in-person skills practice sessions, a skills test and a written examination.

2016 CPR Registration

Please remove and submit to Los Angeles Dental Society

Name: _____ Phone: (_____) _____

Billing Address: _____
