Myface Cadaveric Workshop

AGENDA

Join us for an engaging and insightful workshop organized by the International College of Surgeons (ICS), Singapore section. This event offers a dynamic combination of expert-led lecture series and interactive hands-on practice sessions, providing participants with the perfect balance of theory and practical application. Don't miss this opportunity to enhance your knowledge, refine your skills, and connect with like-minded professionals in an enriching academic environment!

This comprehensive workshop offers hands-on training focused on advanced aesthetic techniques using toxins and fillers, complemented by ultrasound-guided procedures for enhanced precision and safety. Participants will gain practical experience in enhancing key facial areas, including the forehead, periorbital region, nose, jaw, and chin. Guided by expert instructors, this session is designed to equip attendees with the skills and confidence needed to achieve precise, natural-looking results in facial rejuvenation and contouring while leveraging ultrasound technology to minimize risks and optimize outcomes.

INVITED SPEAKERS

SOUTH KOREA
