[Log in](#) to see any potential savings that apply to CHEST members.

Nonphysician providers and physicians-in-training receive a \$700 discount.

Get an intensive review of therapeutic and advanced diagnostic bronchoscopic techniques in this 2-day interactive, hands-on opportunity. Designed around the flipped classroom model, this course will include interactive case-based discussions and hands-on sessions, while procedural skills assessments will be used to track knowledge gain and retention. Topics include malignant and benign airway obstruction, rigid intubation, pulmonary node diagnosis and therapeutic strategies, and more.
