Teaching Physiology On-The-Fly: A Faculty Development Program for Clinical Teachers

September 15-20, 2019

Teaching Physiology On-The-Fly is an innovative, immersive, hands-on faculty development experience held at the MDI Biological Laboratory in Bar Harbor, Maine. In this course, you will:

- Practice integrating physiology and mechanistic thinking into your daily clinical teaching.
- Conduct actual comparative physiology experiments designed to enhance understanding of basic human physiologic principles.
- Create teaching scripts you can employ in clinical practice.

Earn up to 29 CME Credits!

Who Should Apply?

Educators in hospital medicine, general medicine, emergency medicine, and any other physicians who are interested in incorporating physiology-based teaching into clinical practice. Applications are open now.

Rejuvenate yourself by exploring gorgeous Acadia National Park!
