ONSITE COURSE

#329 Pediatric NDT Intensive Handling Intervention...

Course Developed by Gail Ritchie

Instructor:
Gail Ritchie, OTR, C/NDT

Audience: Physical Therapists and Assistants,
Occupational Therapists, Assistants and Speech
Language Pathologists

Course times:
Day 1: 8:00 am – 5:00 pm
Day 2: 8:00 am – 5:00 pm

Motivations, Inc.

SUMMARY: As clinicians treating individuals with central nervous system dysfunction, such as cerebral palsy, congenital hypotonia and other multi-system impairments, we can make advances in our clinical decision making skills by establishing hypotheses regarding the critical impairments that we observe in our assessments and be more precise in our treatment sessions. This 2-day, hands-on lab intensive seminar is designed to further enhance the ability to treat individual's with CNS dysfunction. We will briefly review the current Neuro-Developmental Treatment Approach principles and rationales that support our treatment planning and the strategies used within a treatment session. Development of your handling skills will be emphasized as a way to influence multi-system and single system impairments related to the clients's functional outcomes. Development of specific handling skills related to in-effective posture and movement behaviors observed in the neurologically challenged client will be the primary focus of this seminar. The focus is on pediatrics however because the labs are practiced with adults the information is applicable to the adult population. Course instruction method includes: lecture, lab experience, demonstration, videos, case studies and question/answers.

Discussion of therapeutic intervention and the clinical decision-making process will be discussed. A combination of didactic, video examples, laboratory learning experiences and patient demonstration will ensure the integration of NDT as a foundation for intervention. These CEU's can also be used toward NDTA re-certification.

INSTRUCTOR: Gail Ritchie, OTR, C/NDT is an independent, pediatric therapy provider and Occupational Therapist offering a range of therapies based on the culmination of skills and expertise attained over the last 25 years. Therapies include a variety of techniques and strategies specific to the individual needs of the child and family, while providing both emotional support and challenge. An internationally renowned clinical educator and a certified NDTA instructor since 1996, Gail participated in the development of the book entitled *Neuro-Development Approach: Theoretical Foundations and Principles of Clinical Practice* and the study guide for *Neuro-Developmental Treatment Approach: Theoretical Foundations and Principles of Clinical Practice*. She is currently on the Theory and Curriculum Committees for the NDTA and offers private consultations and individualized therapy intensives. The instructors have no relevant financial or nonfinancial relationships to disclose.

OBJECTIVES: Upon completion of this course, the participant will be able to:

1. Demonstrate the ability to use graded sensory input to influence posture and movement for a given individual with a neuromuscular impairment for participation in ADL's.
2. Prioritize 3 intervention strategies after identifying the relationship between functional limitations, multi-system impairments, and single system impairments.
3. Justify a treatment strategy using at least 3 interventions discussed in this course for a given neuromuscular impairment, to improve range of motion for function in 3 planes of movement, approach, reach and grasp for upper and lower body dressing.
4. Effectively apply sustained and intermittent touch with varying pressures in conjunction with movement, joint compression, or traction, to facilitate antigravity postural control during therapeutic transitions.
5. Identify and apply three treatment strategies that effectively improve establishing a base of support, alignment, muscle activation, and functional outcomes in clients with neuromuscular impairments during play activities.

FORMAT: This is a 15-hour course equivalent to 1.5 CEUs. Motivations Inc is an approved provider by The Texas Chapter of the **APTA** and many additional state and chapter approvals.

Motivations Inc. is an AOTA Approved Provider of professional development. Approved Provider #09127. This Live activity is offered at 1.5 CEUs, Introductory Level, Occupational Therapy Service Delivery/Foundational Knowledge. The assignment of AOTA CEU's does not imply endorsement of specific course content, products, or clinical procedures.

ASHA: This course is offered for 1.5 ASHA CEUs. (Intermediate level, Professional area).

BRING: Course participants should wear loose, comfortable clothing that will allow facilitation of movement. Bring a thicker yoga mat since this is a handling intensive course with labs on the floor for 1 1/2 days.

Course Offerings

For information about course locations and dates,
visit our website at www.motivationsceu.com

Motivations, Inc.

AGENDA:

Day 1:

8:00 Introduction: Essence of NDT
10:30 Break
10:45 Postural Analysis and Control (Lab)
12:00 LUNCH
12:45 NDT Handling Concepts (Lab)
2:30 Break
2:45 Levels of touch – Compression/traction
5:00 Adjourn

Day 2:

8:00 Elongation Facilitation (Lab)
10:30 Break
10:45 Facilitation of Transitions (Lab)
12:00 LUNCH
12:45 Patient demonstration
2:00 Discussion
2:30 Break
2:45 Facilitation of Transitions (Lab)
5:00 Adjourn

Satisfactory Completion: Successful completion of lab practice as confirmed by the instructor's review at the course.
