

Pediatric Pearls

Continuing Medical Education Series

2018-2019

Register Soon!

Deadline October 11, 2018

- Pediatric Pearls Fall—Pulmonary Update
- Pediatric Pearls: A Training in Mental Health
- Pediatric Pearls: Development & Behavior
- Pediatric Pearls: Adolescent Health
- Pediatric Pearls Spring—Otolaryngology

Looking for other opportunities to earn CME? Visit luriechildrens.org/cme for a complete listing of our online CMEs as well as live and on-demand webinars which are always free of charge.

2018–2019 Pediatric Pearls CME Series

An innovative concept in Pediatric Continuing Medical Education

General Information

Ann & Robert H. Lurie Children's Hospital of Chicago is pleased to announce that it will again offer its CME series as a subscription package, one that enables physicians and practices to secure spots in multiple seminars at one discounted price.

By purchasing a full (five-course "showcase") or partial (three-course "sampler") series, attendees can save as much as 25% depending on which package they choose. By buying the series in advance, attendees are not only able to save money, but guarantee a spot in what have been historically sellout conferences.

For added flexibility, purchased spots are fully transferable. Attendees may also purchase spots in individual courses.

Details about each full-day course, the presenters and registration information are included in this catalog as well as on our Web site at www.luriechildrens.org/pearls

Don't miss this opportunity to earn CME credits, network with your colleagues and gain a wealth of practical information on cutting-edge pediatric health topics. For questions or more information, call 312.227.7411 or e-mail cdenari@luriechildrens.org

Accreditation statement

The Northwestern University Feinberg School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Credit Designation statement

The Northwestern University Feinberg School of Medicine designates this live activity for a maximum of 28 *AMA PRA Category 1 Credit(s)*™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Please refer to each program for the breakdown of CME hours.

To Register Online Visit: luriechildrens.org/pearls

Pediatric Pearls Course Objectives

The objectives listed below are meant to provide a high-level overview.

A complete list will be provided on the day of each conference.

Pediatric Pearls Fall— A Focus on Pulmonary

- Review updates in the diagnostic and therapeutic approach to cystic fibrosis
- Discuss the symptomatic profile of a patient with primary ciliary dyskinesia and review the pros and cons of various diagnostic approaches
- Discuss the complex needs of children and adolescents who require chronic non-invasive and traditional ventilator support and changes/advances in support modalities
- Offer support and management tips for child with sleep apnea
- Review sleep disordered breathing and its clinical implications and complications
- Review the high-risk asthma population and treatment challenges and approaches to optimizing care

Pediatric Pearls: A Training on Mental Health

- Discuss emerging trends in the treatment of childhood psychiatric disorders in primary care and subspecialty pediatrics
- Briefly assess children and adolescents for major psychiatric disorders with pharmacological responsiveness
- Identify and monitor stimulants and anti-depressants for children and adolescents with mild to moderate ADHD, anxiety and depression

Pediatric Pearls: Development & Behavior

- Recognize the signs of an irritable infant and determine causes of the fussiness and if a referral to a specialist is warranted
- Discuss the approaches to treating the child with downs syndrome, including new recommendations for advancing their developmental milestones
- Explain the developmental and behavioral concerns in the child with ASD and the dilemmas in screening
- Discuss the developmental and behavioral issues in the child with congenital heart disease
- Recognize the reasons to be alarmed when speech and language s delayed and when to be concerned

Pediatric Pearls: Adolescent Health

- Summarize the trends in tobacco and marijuana products and their use
- Review the association between somatic complaints and anxiety in adolescents
- Develop strategies to address adolescent anxiety in a primary care setting
- Review common pediatric gynecologic disorders and decide when a referral is necessary
- Review diagnosis and treatment of common vulvar complaints in the prepubertal girl
- Identify categories of acne vulgaris and recognize mimickers of acne vulgaris
- Discuss guidelines for treatment based on category of acne vulgaris
- Define key terminology related to gender and sexuality
- Differentiate between developmental trajectories of gender dysphoria in children and adolescents

Pediatric Pearls Spring— Otolaryngology

- Recognize branchial cleft anomalies and prescribe treatment
- Discuss stridor in infants and appropriate management
- Discuss 2019 guidelines for ear infections and ear tubes
- Summarize the consequences of nasal obstructions and surgical approaches
- Discuss the meaning of a positive ANA and when to send an ANA
- Recognize arthritis and enthesitis
- Decide when it is time to refer to Rheumatology
- Discuss the utility of labs in the diagnosis of Juvenile Idiopathic Arthritis
- Discuss the anatomy dimension and location of the normal auricle(external ear)
- Differentiate what is normal vs. abnormal for ear shape
- Recognize the most common and acquired ear anomalies
- Describe causes of constipation and incontinence reasons for referral to a bowel management specialist
- Discuss non-operative interventions for patients with constipation and/or incontinence
- Outline operative options for patients who have failed non-operative treatment

Pediatric Pearls Fall—Pulmonary Update

AGENDA

Thursday, Oct. 11, 2018

Register by Oct. 2, 2018

Fountain Blue Banquets & Conference Center
2300 Mannheim Road
Des Plaines, IL 60018
847.298.3636

FREE
PARKING

This one-day symposium is designed for healthcare providers interested in the latest pediatric treatments related to several complex pediatric pulmonary diseases as well as more common dilemmas. For this installment, we present lectures on cystic fibrosis, primary ciliary dyskinesia, sleep medicine, management of children on chronic ventilator support, pulmonary disease with muscular weakness, severe asthma, chronic clearance therapies and newborn screening guidelines for cystic fibrosis.

This one-day symposium is designed for healthcare providers interested in learning about topics that some of their adolescent patient population will encounter at some point in these important developing years. Everything from skin conditions to substance abuse to anxiety will be addressed. Taking it one step further, the program will also feature experts to discuss other sensitive but timely issues such as STDS/STIs, female issues and healthcare concerns for the gender diverse youth.
