PROGRAM OVERVIEW

The **16th Annual Caribbean Dermatology Symposium**, being held **January 17-21, 2017**, at the Hilton Aruba, features an educational program with internationally-known faculty who will provide the latest updates in medical dermatology and the diagnosis and treatment of various dermatologic conditions. Join us in Aruba for four days of cutting-edge education in managing diseases of the skin. Take the opportunity to network with faculty and peers as well as learn about complicated and common problems seen in practice. You'll gain insight and knowledge that will be immediately useful in the care of your patients. We look forward to seeing you in January.

Register by September 30, 2016 and save up to \$180 off the regular registration fee.

TARGET AUDIENCE

**Dermatologists • Dermatology Residents
Family Practitioners • Internists • Physician Assistants
Nurse Practitioners • Nurses
and other Healthcare Professionals**

LEARNING OBJECTIVES

At the conclusion of this live activity, participants should be better able to:

- Apply the most current diagnostic methods and treatments for common skin diseases
- Identify potential adverse effects and levels of efficacy of newer dermatologic treatments
- Explain the role of available biologic agents in treating psoriasis and how to incorporate them into practice
- Describe the mechanisms of action, efficacy and safety of the current and emerging agents used to treat psoriasis as well as appropriate patient selection.
- Incorporate new approaches for managing acne, rosacea, atopic dermatitis, contact dermatitis and actinic keratosis
- Discuss new approaches in the treatment of moles, melanoma and other skin cancers
- Formulate approaches to the management of tropical diseases
- Analyze treatments for the management of onychomycosis, other fungi and warts
- Discuss approaches to treating dermatologic conditions in the pediatric patient
- Utilize dermoscopy in diagnosis and detection of skin cancers
- Compare treatment options for hidradenitis suppurativa
- Summarize the efficacy and safety of fillers, toxins, devices and techniques currently available in aesthetic and procedural dermatology
- Discuss the latest recommendations for patch testing/phototesting and explain how they should be used to improve the treatment of allergic conditions
- Utilize enhanced practice management techniques and tools to increase office efficiency and facilitate patient care
- Integrate into daily practice evidence-based recommendations on new and emerging therapies for common and uncommon dermatologic diseases
- Recognize cutaneous manifestations of common systemic diseases.

ZIKA VIRUS INFORMATION

We are aware of concerns regarding Zika virus in many areas of the world, including the Caribbean. Since the majority of cases occur from mosquito bites, we recommend that our attendees come prepared to protect themselves with appropriate clothing and insect repellent. We suggest you review the CDC Zika recommendations at:

<https://wwwnc.cdc.gov/travel/notices/alert/zika-virus-aruba>.

Aruba's health authorities and tourism sector have been working together to implement an island-wide proactive plan, including: providing hotel guests with convenient access to insect repellent; inspecting and covering outdoor water systems; and installing traps and window/door screening.
