★ Life-Long Tradition and Excellence ★

Speakers

Roseann Mulligan, DDS, MS, FADPD, DABSCD

Charles M. Goldstein Professor of Community Dentistry, Herman Ostrow School of Dentistry of USC; Associate Dean of Community Health Programs and Hospital Affairs; Chair, Division of Dental Public Health and Pediatric Dentistry; Professor of Gerontology, Leonard Davis School of Gerontology, University of Southern California; Past President of the American Society for Geriatric Dentistry.

Jennifer Ailshire, PhD

Assistant Professor of Gerontology, Davis School of Gerontology, USC. Her research is particularly focused on the importance of the neighborhood environment and social relationships in determining health over the life course.

Yaara Berdan, DDS

Assistant Professor of Clinical Endodontics, Division of Endodontics, Orthodontics and General Practice Residency at the Herman Ostrow School of Dentistry of USC. She obtained her DDS degree from the University of California at San Francisco (UCSF) and her endodontic certificate from the University of Illinois at Chicago in 2000.

Phuu Han, DDS, PhD

Specialist in Oral Medicine and Oro-facial Pain, Diplomat of the American Board of Oro-facial Pain; Assistant Professor of Clinical Dentistry, Division of Dental Public Health and Pediatric Dentistry, Herman Ostrow School of Dentistry of USC.

Lisa Hou, DDS

Clinical Assistant Professor in the Section of Geriatrics and Special Patients Care, Division of Dental Public Health and Pediatric Dentistry, Herman Ostrow School of Dentistry where she provides clinical supervision to doctoral dental students caring for special needs patients.

Maryalice Jordan-Marsh, BSN, MS, MSN, PhD

Associate Professor in the School of Social Work at USC and Senior Scholar, School of Cinematic Arts Creative Media and Behavioral Health Center and the School of Social Work Center for Innovation and Research on Veterans and Military Families. She is a nurse psychologist studying the education and empowerment of people about health issues, especially participatory e-health.

Tae Kim, DDS

A specialist in Prosthodontics, Dr. Kim is an Associate Professor of Clinical Dentistry and Chair of the Removable Section in the Division of Restorative Sciences at the Herman Ostrow School of Dentistry of USC. He has authored numerous clinical and research articles on CAD CAM Denture and implant dentistry.

Pascal Magne, MD

Dr. Magne obtained his B.Sc. (Switzerland) then moved to Geneva where he specialized in Prosthodontics and Operative Dentistry (D.M.D., M.Sc.). He received his Ph.D. degree in 2002 and served as Senior Lecturer from 1999 to 2004. Tenured Associate Professor at USC where he received the endowed Chair of Esthetic Dentistry, the Don and Sybil Harrington Foundation Professor of Esthetic Dentistry.

Edward Schneder, MD

Dean Emeritus and Professor of Gerontology, Davis School of Gerontology, Professor of Medicine, Keck School of Medicine, Professor of Biological Science, Dornsife College of Letters, Arts and Sciences.

Piedad Suarez, DDS

Specialist in Oral Medicine and Oro-facial Pain and Professor of Clinical Dentistry. Chair of the Section of Geriatrics and Special Patients in the Division of Dental Public Health & Pediatric Dentistry at the Herman Ostrow School of Dentistry.

Synopsis

Older adults are seeking dental care in far greater numbers, expecting to have the latest innovative materials and technologic approaches available to them. Unique to this population are factors such as variable health profiles, social support systems, and functional capabilities. Oral health findings can also be highly variable whether compounded by a lifetime of treatment or neglect and often compromised by systemic issues.

Recognizing the diverse nature of the elderly and their needs, this symposium will approach the older adult from a practical perspective and include topics that cover many of the relevant issues faced when treating aging individuals. Practice approaches for both the healthy, community-based patient and frailer individuals will be discussed.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

Topics to be covered:

- CAD/CAM technology to fabricate dentures
- Participatory e-health games and applications
- Physical, cognitive and psychosocial characteristics of the oldest of the old
- No-post designs and advantages to non-retentive restorative designs
- New anti-coagulant medication protocols for dental care
- New medical technological advances
- Non-pharmacology management of demented dental patients
- Health foods and dietary supplements topics for older adults
- Dental treatment modifications for multiply involved patients
- Systematic approach to improving access and negotiating narrow canals
- Medication induced osteonecrosis of the jaw

Upon completion participants should be able to:

- Make a case for assessment of technological savvy and habits of the patient as a means of tailoring care
- Identify physical, cognitive and psychosocial characteristics of adults with longer than expected lifespans
- Master the key elements of adhesion to dentin
- Enumerate the pros and cons of CAD/CAM technology for denture fabrication
- Utilize proper approaches for patients on the newer anticoagulant medications
- Appreciate advanced medical technology being used in dental patients
- Illustrate non-pharmacologic techniques to utilize in managing demented dental patients
- Explain to patients the latest health foods and need for dietary supplements
- Appreciate the application of dental treatment modifications for a medically complex patient
- Learn how to overcome the challenges encountered when providing endodontic therapy to geriatric patients
- Use AAOMS recommendations to manage medication induced osteonecrosis of the jaw
