GOALS & OBJECTIVES

At the conclusion of the symposium, participants will be able to:

- Identify and analyze new and important studies in medical, surgical/cosmetic dermatology, and dermatopathology.
- Apply the most current research on the diagnosis and treatment of medical dermatological conditions, such as psoriasis, eczema, actinic keratosis, rosacea, and skin cancer.
- Compare and contrast new surgical techniques including surgical closures and cosmetic procedures and apply them to their practice.
- Identify new cosmetic agents, including fillers and neurotoxins, and learn injection techniques that can improve patient safety and outcomes.
- Improve skills by observing live patient demonstrations using approved devices for the treatment of photodamage and age-related skin changes.
- Recognize, manage and appropriately treat unusual skin conditions, including the use of new relevant injectable and IV infusion treatment.
- Assess the various new modalities for evaluating and treating melanoma.

WHO SHOULD ATTEND?

Dermatologists, cosmetic surgeons, physician assistants, nurse practitioners, residents, fellows, medical students and other allied health professionals.
