

OSTOMY MANAGEMENT SPECIALIST® COURSE

5-DAY ONSITE

Each year thousands of individuals of all ages face life changing surgeries to correct gastrointestinal or urinary tract disorders. These individuals require trained professionals to help them successfully adapt to the unique concerns caused by these surgeries. An Ostomy Management Specialist® (OMS) is trained to understand both the physiological and emotional challenges people with stomas face on a daily basis. This course will take you through the anatomy and physiology of the systems involved in fecal/urinary diversions. The course includes hands-on workshops and online pre-course modules.

EDUCATIONAL COURSES FOR LPN/LVN • RN • NP • PTA • PT • OTA • OT
