

# Women's Health for Primary Care

Friday, February 5, 2016  
Cedarbrook Lodge, SeaTac, Wash.

## About the Course

This course is designed to address a wide range of clinical topics associated with women's health. Attendees will receive clinical updates and useful management strategies for commonly seen conditions. Course content will be clinically-oriented, informal, and interactive, with illustrative case presentations and opportunities for questions and comments.

## Target Audience

Primary care physicians, residents, ARNPs, PA-Cs, and other health care professionals.

## Course Objectives

At the end of the conference, attendees will be able to:

- Summarize approaches to treatment of menopausal patients.
- Recognize, diagnose, and treat young women with polycystic ovary syndrome.
- Utilize the latest approaches and strategies for the treatment of urinary incontinence and prolapse.
- Discuss treatment options related to vulvar dermatology.
- Review treatment pearls regarding breast cancer screening, cervical cancer screening, and contraception.
- Assess the causes of abnormal uterine bleeding.
- Describe post-coital contraception options
