FOR ITS 12TH EDITION, IMCAS ASIA IS PROUDLY RETURNING TO Bangkok!

We are thrilled to announce that we have teamed up with THAICOSDERM (Thai Society of Cosmetic Dermatology and Surgery) in the bustling city of Bangkok.

Located in the heart of Southeast Asia, the capital of Thailand is the world leader in plastic surgery and aesthetic dermatology.

We are delighted to welcome over 120 international speakers during 150 teaching hours, with more than 1,500 attendees arriving from all over the globe.

With an emphasis on Asian morphologies, innovations in medical techniques, laser & EBD and injectable treatments, we are proud to bring you presentations from the finest doctors in the aesthetic medical field, whether they are well-known dermatologists or plastic surgeons.

This year, our program is full to the brim with all of our most notable courses and lectures. With 15 key themes covering 3 full educational days, there is something for every aesthetic practitioner. From surgical and non-surgical procedures for the face, breast and body, to clinical dermatology, regenerative medicine, and practice management, not to forget discussions focusing on injectables, lasers & EBDs and genital treatments.

Our ever-popular Anatomy on Cadaver Workshop is returning this year to offer physicians an in-depth view into the anatomy behind the injections during a full day of live streaming. In addition, our optional Video Classes will enrich your learning experience through lessons on individual topics, which demonstrate processes and techniques that you can take home with you.

After three intensive days engaging in all of our cutting-edge events, relax and get to know your peers better with our Networking Cocktail on the Friday evening and our elegant Gala Dinner on the Saturday evening.

Bangkok is home to a vibrant culture seeped in tradition. A place where modernity and tradition blend together, it is easy to see why so many people flock to the city every year. As a result, Bangkok is the perfect setting for a weekend filled with the latest developments in the medical aesthetic field.

QUALITY ASSURANCE

Speakers

IMCAS insists on maintaining complete independence between instructional courses and industry sponsors. Scientific lectures are presumed to be based on objective and unbiased interpretations of facts and evidence, with a fair representation of all specialties in the field of aesthetics. Anyone who is a speaker during the conference or contributes to the development of the scientific program must have a disclosure statement, which will be displayed before the start of their lecture.

For more information, please visit www.imcas.com

Delegates

In order to receive a Certificate of Attendance at the end of the conference, each registered delegate has to fill out the online evaluation form at www.imcas.com within 30 days following the congress. The certificate will then be available for download on the delegate's account. These evaluations are an invaluable source for improving our congresses each year, ensuring we offer delegates a scientific program that matches their needs and expectations.

Sponsors

IMCAS earns its revenues from both industry and physician subscriptions. Industry parties may support IMCAS by providing either **SPONSORSHIP** or **EDUCATIONAL GRANTS**. Sponsoring an event involves a partnership: in return for finances, a sponsor may present their syntheses of studies or trials. An educational grant is a donation with no exchange.

LIVE ANATOMY DON'T MISS THIS EVENT!

THIS YEAR WE ARE BRINGING YOU A FULL DAY OF LIVE ANATOMY ON CADAVER WORKSHOP!

Our celebrated Cadaver Workshop is one of the most talked about sessions throughout our congresses. Broadcasting live from a medical school, you will get a glimpse at the anatomy behind the procedures. With live patient demonstrations taking place alongside the dissections, for more a practical insight.

Take the chance to broaden your knowledge of injectables and suspending devices through this deeper look into anatomic structures, while learning how to reduce risks and avoid complications by identifying key anatomy regions and critical danger zones.

These 8 immersive sessions cover muscles, the vascular system and female genitals in the morning, followed in the afternoon by sessions on hand, temple & periorbital, midface & nose, lip & masseter, and neck & jawline areas as well as the retrobulbar and peri bulbar injections and the fat anatomy for breast and buttocks treatment.

Expert speakers will present simultaneously with the demonstrations, providing insights and concepts throughout. At the end of each demonstration, the floor will be open to debates and discussion from the audience. This is the perfect opportunity to pose your questions to our experts.

LEARNING OBJECTIVES:

- IN-DEPTH LOOK INTO ANATOMY BEHIND
- PINPOINT DANGER ZONES
- IMPROVE INJECTION & THREAD TECHNIQUES
