with limited seats for up
to **65 registrants!**

8th Annual Symposium on Lysosomal Storage Disorders

Genetic deficiencies of lysosomal components, most commonly enzymes, are known as “lysosomal storage disorders” (LSDs) and lead to lysosomal dysfunction, broadly affecting peripheral organs and the central nervous system, debilitating patients and is frequently fatal. This continuing medical education conference will update members of the multidisciplinary care team on most recent advances in identification, diagnosis, pathophysiology, management and treatment of a wide range of lysosomal storage disorders. The theme of the course is translation of scientific breakthroughs to the bedside. Highlights include presentation and discussion of various clinical cases and a clinical update on Gaucher disease.

FEATURED TOPICS

- Advances in molecular diagnosis of lysosomal storage disorders
- Clinical update on Gaucher disease
- Breakthroughs in therapies from the bench and bedside

COURSE DIRECTORS

Barry E. Rosenbloom, MD, FACP
Tower Hematology Oncology Medical Group
Clinical Professor of Medicine
Director, Gaucher Diagnostic
and Treatment Center
Cedars-Sinai

Natalie M. Gallant, MD, FACMG
Clinical Genetics and Medical Biochemical Genetics
Miller Children's and Women's Hospital
Long Beach Memorial Medical Center
Assistant Clinical Professor
Division of Genetic and Genomic Medicine

SPECIAL GUEST FACULTY

Neal Weinreb, MD, FACP
University of Miami,
UHealth Sylvester Comprehensive Cancer Center
Coral Springs, FL

*Additional clinical and basic science faculty
from throughout Southern California will present
at this conference.*

WHERE

Cedars-Sinai Medical Center
Advanced Health Sciences Pavilion, PEC 6&7
8701 Gracie Allen Drive
Los Angeles, CA 90048

WHEN

Thursday, December 6, 2018
8:00 A.M. – 4:45 P.M.

REGISTRATION

Seating is limited, and registration is required.
