

APRIL 6-7, 2018

University of Virginia Stroboscopy and Voice Course

University of Virginia Health System
Education Resource Center
1220 Lee Street, Charlottesville, VA 22903

Provided by the Office of Continuing Medical Education, University of Virginia, School of Medicine

JOIN US at the University of Virginia in beautiful Charlottesville for the UVA Voice Center's Stroboscopy & Voice Course. This two-day intensive course is designed to provide practical and hands-on education for speech-language pathologists and otolaryngologists in the performance and interpretation of laryngeal stroboscopy, as well as voice therapy basics. Lectures will cover the principles of laryngeal function, fundamentals of laryngeal stroboscopy and interpretation, case studies and diagnostics, voice therapy techniques, and the Interdisciplinary Clinic model. Conference Faculty will include the UVA Voice Clinic team as well as experts from a variety of disciplines. Hands-on instruction in both rigid and flexible endoscopy will be provided on both days of the conference. The conference will take place in UVA's Medical Simulation Center, a state-of-the-art, interactive training and research facility. This conference is appropriate for beginner through advanced-level clinicians.

Continental breakfast and lunch will be provided on both conference days. The conference center and the hotel are both located in the heart of the UVA campus, walking distance to many historical and cultural sites and popular restaurants.

Friday will conclude with our Fourth Annual World Voice Day Celebration – a free concert featuring performances by some of Charlottesville's best singer-songwriters. We hope you will join us for a chance to soak up our local music scene.

Education Objectives

At the conclusion of this course, participants should be able to demonstrate:

- Emerging hands-on skill with rigid and flexible laryngoscopy
- A beginner-to-intermediate skill level in interpreting laryngeal stroboscopy
- A beginner-to-intermediate skill level in making recommendations based on interpretation of laryngeal stroboscopy
- An understanding of common voice pathologies and their subsequent treatments
- An understanding of the role of the physical therapist in the Multidisciplinary Voice Clinic
